Definitions

- 1(1) All definitions in the *Water (Ministerial) Regulation* and in section 1 of the *Water Act* apply except where expressly defined in this Code of Practice.
- (2) In this Code of Practice:
 - (a) “carry out” when used in the context of an outfall structure activity includes to commence or continue an outfall structure activity;
 - (b) “class” means the class of a water body that is specified in section 7, or that is designated by a class symbol on a map that is listed in Schedule 5;
 - (c) “Department” means the Department administered by the Minister;
 - (d) “emergency” means a situation where there is an imminent risk to the aquatic environment, public health or safety, or an imminent risk of structural failure of an outfall structure;
 - (e) “fish” means fish used for domestic, sport and commercial purposes, and fish of special concern, including but not limited to rare, endangered, threatened or vulnerable species;
 - (f) “isolation method” means an outfall structure construction technique in which there is an excavation of an area in the bed or banks of a water body, and isolation of the surface water in the water body from the excavation area, including but not limited to a flume, dam and pump, high volume pump bypass and two stage coffer dams;
 - (g) “map” means a water management area map listed in Schedule 5, and includes the legends and special conditions on a map;
 - (h) “mapped water body” means a water body that appears on a map that is listed in Schedule 5;
 - (i) “open method” means an outfall structure construction technique in which there is an excavation of an area in the bed or bank of a water body, that is not isolated from surface water in the water body;
 - (j) “outfall structure” means a pipe or structure in, on, under, or adjacent to a water body, that is constructed for the discharge of:
 - (i) precipitation that has fallen and been collected, or
 - (ii) liquid and water-carried wastes,to a water body, and includes any associated structure that is required for the installation, maintenance or protection of the outfall structure;
 - (k) “outfall structure activity” means the placement, construction, installation, maintenance, replacement or removal of all or part of an outfall structure, or any activity associated with that placement, construction, installation, maintenance, replacement or removal;
 - (l) “plan” means a plan specified in section 6;
 - (m) “productive capacity” means the natural capability of habitats that comprise the aquatic environment to produce healthy fish that are safe for human consumption, or to support or produce the naturally occurring diversity of aquatic organisms upon which fish depend;
 - (n) “professional engineer” means a Professional Engineer or Registered Professional Technologist (engineering), registered with the Association of Professional Engineers, Geologists and Geophysicists of Alberta;
 - (o) “qualified aquatic environment specialist” means a person who:
 - (i) possesses:

- a post-secondary degree in biological sciences;
- a technical diploma in biological sciences; or
- educational equivalencies,
- (ii) has a detailed knowledge of the aquatic environment, including fish and fish habitat, management and assessment, and
- (iii) is currently experienced with:
 - (A) fisheries and aquatic environment assessment methods; and
 - (B) the determination of mitigation measures required to maintain the productive capacity of the aquatic environment, including fish habitats in Alberta that may be adversely affected by the carrying out of an outfall structure activity in and adjacent to the water, bed and shore of water bodies;
- (p) “restricted activity period” means the time period set out in this Code of Practice during which, generally, no outfall structure activity is permitted;
- (q) “this Code of Practice” means the *Code of Practice for Outfall Structures on Water Bodies*, published by the Department, as amended or replaced from time to time;
- (r) “uncoded water body” means a water body that appears on a map listed in Schedule 5, and that has no class symbol specified on the map;
- (s) “unmapped water body” means a water body that does not appear on a map listed in Schedule 5;
- (t) “UTM coordinates” means coordinates that use the Universal Transverse Mercator grid to identify or plot the specific location of a site or object; and
- (u) “water body” means, for the purpose of this Code of Practice, a water body with defined bed and banks, whether or not water is continuously present, but does not include fish bearing lakes.

Bound by Code of Practice

- 2 Any person who carries out an outfall structure activity shall comply with the requirements set out in this Code of Practice.

Notice to the Director

- 3(1) For the purposes of section 4 of the *Water (Ministerial) Regulation*, a person who carries out an outfall structure activity must provide notice to the Director, in writing, at least 14 calendar days before any outfall structure activity is carried out, or within a time specified in writing by the Director.
- (2) The written notice under subsection (1):
 - (a) must contain all the information specified in Schedule 1, unless otherwise specified in writing by the Director; and
 - (b) authorizes a person to carry out the outfall structure activity in accordance with this Code of Practice for the period of time specified in the notice.
 - (3) The outfall structure activity must be conducted in accordance with the information contained in the written notice provided to the Director under subsection (1).
 - (4) The person carrying out an outfall structure activity shall provide the Director with written notice in accordance with subsection (1), regarding any change to the information contained in the original notice.

Notice where the outfall structure activity is not completed within time period

- 4(1) Where notice is provided in accordance with section 4(1) of the *Water (Ministerial) Regulation* and section 3 of this Code of Practice, and the outfall structure activity has not been completed within the time period specified in the notice, the notice is no longer valid, and a person who carries out an outfall structure activity must provide a new notice prior to carrying out the outfall structure activity.
- (2) The new notice under subsection (1) must contain:
- (a) the new date for the commencement or continuation of the outfall structure activity;
 - (b) the information specified in clause (i) of Schedule 1, as applicable; and
 - (c) any information that has changed from the information provided in the original notice.

Emergency

- 5(1) Where there is an emergency that makes it impossible for a person who carries out an outfall structure activity to provide notice in accordance with section 3, a person who carries out an outfall structure activity must:
- (a) take appropriate measures to deal with the emergency; and
 - (b) immediately inform the Director by telephone at 1-800-222-6514 of the emergency.
- (2) Information under subsection (1)(b) must contain:
- (a) the information specified in clauses (a), (b), (d), (e) and (f) of Schedule 1;
 - (b) the legal description of the land on which the outfall structure is located;
 - (c) any other information regarding the nature of the emergency that is available to the person carrying on the outfall structure activity at the time; and
 - (d) any other information requested by the Director.
- (3) Within 30 days of completion of the measures required to resolve the emergency, the person who carries out an outfall structure activity must provide the Director with the following information:
- (a) information specified under clause (c) in Schedule 1;
 - (b) a description of the construction methods and conditions as described in section 8 and Schedule 3, as applicable, that were used in carrying out the outfall structure activity; and
 - (c) a description of measures taken to meet the applicable requirements of Part 1 of Schedule 2, section 9 and Schedule 3 of this Code of Practice, including a statement whether the outfall structure activity incorporated the specifications of a qualified aquatic environment specialist.

Plans

- 6(1) At least 14 days before an outfall structure activity is carried out, a person who carries out an outfall structure activity must prepare a plan for the outfall structure activity that contains the following:
- (a) the written information and specifications prepared and certified by a professional engineer as meeting the requirements specified in Schedule 2;
 - (b) the construction methods and conditions to be used in carrying out the outfall structure activity as determined in accordance with sections 8, 9

- and 10 and Schedule 3, indicating the written specifications of a qualified aquatic environment specialist, and how those are incorporated into the plan;
- (c) an outline of the contingency measures to be taken in the event of conditions that may cause adverse effects, taking into account any restricted activity periods;
 - (d) monitoring measures that will be used prior to and in carrying out the outfall structure activity, as contained in the written specifications of a professional engineer, person carrying out an outfall structure activity and a qualified aquatic environment specialist, under sections 8 and 9 and Schedule 3 of this Code of Practice; and
 - (e) specification of the monitoring measures that will be taken, during the anticipated lifespan of the outfall structure, to meet the requirements of this Code of Practice.
- (2) A person who carries out an outfall structure activity must comply with the plan prepared for the outfall structure activity under subsection (1), except where measures must be taken to resolve an emergency.
- (3) Notwithstanding subsection (1), after notice to the Director has been provided in accordance with section 3(1), a person who carries out an outfall structure activity shall not change a plan unless:
- (a) the change complies with this Code of Practice; and
 - (b) notice of the change is provided to the Director in accordance with section 3 and Schedule 1.
- (4) Where a change is made to a plan under subsection (3), all of the provisions of this Code of Practice apply to the change as if the change had been included in the original plan under subsection (1).

Maps and class of water bodies

- 7(1) A map that is listed in Schedule 5 forms part of this Code of Practice and:
- (a) designates the class of a mapped water body as Class A, B, C or D;
 - (b) specifies the restricted activity period for each class of water bodies;
 - (c) provides the location of Class A and B water bodies; and
 - (d) specifies special conditions for some water bodies for the purposes of this Code of Practice, subject to subsection (5).
- (2) The class of a mapped water body is the class that is designated by a class symbol on a water management area map except:
- (a) where a mapped Class C water body is a tributary to a Class A water body, that portion of the water body for a distance of 2 kilometres upstream from the point where it enters the Class A water body is Class A;
 - (b) where a mapped Class C water body is a tributary to a Class B water body, that portion of the water body for a distance of 2 kilometres upstream from the point where it enters the Class B water body is Class B;
 - (c) where a mapped Class B water body is a tributary to a Class A water body, that portion of the water body for a distance of 2 kilometres upstream from the point where it enters the Class A water body is Class A; and
 - (d) where a mapped Class D water body is a tributary to a Class A, B or C water body, that portion of the tributary water body for a distance of 2 kilometres upstream from the point where it enters the Class A, B or C water body is the same class as the water body that is entered.
- (3) The class of an uncoded water body is as follows:

- (a) Class D, unless otherwise specified in clause (b); and
 - (b) where an uncoded water body is a tributary to a Class A, B or C water body, that portion of the uncoded water body for a distance of 2 kilometres upstream from the point where the uncoded water body enters the Class A, B or C water body is the same class as the Class A, B or C water body that is entered.
- (4) The class of an unmapped water body is as follows:
- (a) where an unmapped water body enters a mapped Class A water body, the unmapped water body:
 - (i) is Class A along that portion of the unmapped water body that is within a distance of 2 kilometres upstream from the mouth of the unmapped water body, including where the unmapped water body is dry or frozen to the bed of the water body at the time of the outfall structure activity, and
 - (ii) is Class B for any other portion of the unmapped water body;
 - (b) where an unmapped water body enters a mapped Class B water body, the unmapped water body:
 - (i) is Class B along that portion of the unmapped water body that is within a distance of 2 kilometres upstream from the mouth of the unmapped water body, including where the unmapped water body is dry or frozen to the bed of the water body at the time of the outfall structure activity, and
 - (ii) is Class C along any other portion of the unmapped water body;
 - (c) where an unmapped water body enters a mapped Class C water body, the unmapped water body:
 - (i) is Class C along that portion of the unmapped water body that is within a distance of 2 kilometres upstream from the mouth of the unmapped water body, and
 - (ii) is Class C along any other portion of the unmapped water body, and the requirements regarding restricted activity periods under section 10(5)(b) apply;
 - (d) where an unmapped water body enters a mapped Class D water body, the unmapped water body is Class D; and
 - (e) where an unmapped water body enters a fish bearing water body, whether or not the fish bearing water body is mapped, the entirety of the unmapped water body is Class C, and the requirements regarding restricted activity periods under section 10(6) apply.
- (5) The maps identified in subsection (1), and listed in Schedule 5, are revised with the following corrections and additions:
- (a) High Prairie Management Area
 - (i) Unnamed mapped water body - the entire length of an Unnamed Creek (Twp 87 Rge 04 W5M) connecting Peerless Lake and Graham Lake is designated as a Class C Water Body having a Restricted Activity Period of September 10 to July 15.
 - (b) Edson Management Area

Pre-Construction

- 8 Before any outfall structure activity is commenced, the person carrying out the outfall structure activity must, for water bodies that are designated as Class A, B or C water bodies, take photographs or video-recordings of the water body at the outfall structure site as follows:
- (a) one or more photographs or video-recordings of the water body upstream from the outfall structure site;
 - (b) one or more photographs or video-recordings of the water body downstream from the outfall structure site; and
 - (c) two or more photographs or video-recordings at the outfall structure site, one of each bank taken from the opposite bank.

Construction methods and conditions

- 9(1) In addition to complying with the requirements for restricted activity periods under section 10, any person carrying out an outfall structure activity shall comply with the following requirements:
- (a) each outfall structure activity must comply with the requirements of:
 - (i) clause (a), and
 - (ii) clause (b) in Part 1 of Schedule 2;
 - (b) for an outfall structure activity that takes place in a Class A water body:
 - (i) the construction of a new outfall structure is not allowed,
 - (ii) the repair or maintenance of an existing outfall structure must be done:
 - (A) using the isolation method; or
 - (B) in accordance with the written specifications of a qualified aquatic environment specialist; unless the water body is dry or frozen to the bed of the water body at the time of the outfall structure repair or maintenance activity, and
 - (iii) where the replacement of a section of the outfall structure is required, the discharge capacity of the replacement outfall structure must not exceed the discharge capacity of the outfall structure that existed before the replacement outfall structure activity occurred;

- (c) for an outfall structure activity that takes place in a Class B, C or D water body, the following construction methods and conditions for carrying out the outfall structure activity must be followed:
 - (i) for a method other than the isolation method, Part 2 of Schedule 3 shall be followed,
 - (ii) for the isolation method:
 - (A) the conditions in the applicable part of Schedule 3 shall be followed; and
 - (B) the isolation method shall be carried out in accordance with the written specifications of a qualified aquatic environment specialist, as determined in accordance with subsection (2) of this section; or
 - (C) carried out in accordance with Part 5 of Schedule 3, if the water body is dry or frozen to the bed of the water body at the time of the outfall structure activity.
- (2) For the purposes of this section:
 - (a) the determination of whether clause (b) in Part 1 of Schedule 2 will be met, must:
 - (i) be conducted by a professional engineer, and
 - (ii) take into account the technical and environmental feasibility of the construction method or condition; and
 - (b) the determination of whether a construction method or condition will meet the requirements of clause (a) in Part 1 of Schedule 2 must be conducted by a qualified aquatic environment specialist.

Restricted activity periods

- 10(1) Unless otherwise authorized under this section, no person shall carry out any outfall structure activity within any applicable restricted activity period.
- (2) Subject to subsections (3), (4), (5) and (6), each permitted outfall structure activity:
 - (a) must be carried out for mapped Class A water bodies, within the time period specified by a qualified aquatic environment specialist;
 - (b) must be carried out in mapped Class B and C water bodies, outside the restricted activity period specified on the applicable map, or within the time period specified by a qualified aquatic environment specialist;
 - (c) may be carried out within the restricted activity periods for Class C water bodies that are dry or frozen to the bed of the water body at the time of the outfall structure activity; and
 - (d) on a Class D water body does not have a restricted activity period.
- (3) Where an unmapped water body enters a mapped Class A water body:
 - (a) the permitted outfall structure activity shall be carried out within the period recommended by a qualified aquatic environment specialist for the portion of the unmapped water body within a distance of 2 kilometres upstream from the mouth of the unmapped water body;
 - (b) for any other portion of the unmapped water body other than that specified in clause (a):
 - (i) the unmapped water body has the restricted activity period of the nearest mapped Class B or C water body entering the mapped Class A water body, or
 - (ii) if there is no mapped water body entering the mapped Class A water body, has the restricted activity period for the

- mapped Class B or C water body that is immediately downstream of the mapped Class A water body.
- (4) Where an unmapped water body enters a mapped Class B water body, the restricted activity period is the restricted activity period for the mapped Class B water body that the unmapped water body enters.
- (5) Where an unmapped water body enters a mapped Class C water body:
- (a) the restricted activity period for the portion of the unmapped water body within a distance of 2 kilometres upstream from the mouth of the unmapped water body, is the restricted activity period for the mapped Class C water body; and
 - (b) for any other portion of the unmapped water body other than that specified in clause (a):
 - (i) where there is no documented evidence of fish presence in the unmapped water body, there is no restricted activity period, or
 - (ii) where there is documented evidence of fish presence in the unmapped water body, the restricted activity period is the restricted activity period of the nearest mapped water body that enters the mapped Class C water body.
- (6) Where an unmapped water body enters a fish bearing water body, whether or not the fish bearing water body appears on a map, the restricted activity period for the unmapped water body:
- (a) is the same as that specified for the nearest mapped water body entering the fish bearing water body;
 - (b) if there is no mapped water body entering the fish bearing water body, is the same as that specified for the mapped outlet water body of the fish bearing water body; or
 - (c) if there is no mapped outlet water body of the fish bearing water body, is the same as that specified for the nearest mapped water body that is designated as a mapped Class C water body.
- (7) All written specifications prepared by a qualified aquatic environment specialist must:
- (a) consider all restricted activity periods; and
 - (b) meet the requirements of Schedule 4.

Certification

- 11(1) Where a qualified aquatic environment specialist has prepared specifications in a plan for an outfall structure activity under section 6(1)(b) of this Code of Practice, a qualified aquatic environment specialist must certify in writing that the design of the outfall structure activity meets the requirements of clause (a) in Part 1 of Schedule 2.
- (2) Within one year after the outfall structure activity has been completed, a person who carries out an outfall structure activity must certify in writing that:
- (a) the plan prepared under section 6 was followed in carrying out the outfall structure activity; and
 - (b) the construction of the outfall structure met the requirements of:
 - (i) clause (a), and
 - (ii) clause (b)in Part 1 of Schedule 2.
- (3) The certifications required under subsections (1) and (2) and subsection 6(1)(a) shall be retained until the outfall structure has been removed.

Reporting

- 12(1) (a) A person who carries out an outfall structure activity must immediately after a contravention of this Code of Practice, report to the Director by telephone at (780) 422-4505; and
- (b) a report under clause (a) must contain the details of any contravention of this Code of Practice, including, but not limited to:
- (i) possible adverse effects on the aquatic environment resulting from the contravention, and
 - (ii) initial actions taken to mitigate the contravention.
- (2) A person who carries out an outfall structure activity must, within seven (7) calendar days of a contravention of this Code of Practice, or within another time period specified in writing by the Director, provide to the Director a written report, unless the requirement for the report is waived by the Director.
- (3) The written report under subsection (2) shall contain, as a minimum, all of the following information:
- (a) a description of the contravention;
 - (b) the legal land description of the location of the contravention;
 - (c) name of the water body on which the outfall structure activity was being carried out, if available;
 - (d) an explanation as to why the contravention occurred;
 - (e) a summary of all preventive measures and actions that were taken prior to the contravention;
 - (f) a summary of all measures that were taken to mitigate any adverse effects related to the contravention;
 - (g) a summary of proposed measures to address any remaining adverse effects and potential adverse effects related to the contravention;
 - (h) the names, addresses, phone numbers and responsibilities of all persons carrying out the outfall structure activity at the time that the contravention occurred;
 - (i) proposed preventive measures designed to prevent future contraventions;
 - (j) any information that was maintained or recorded under this Code of Practice, as a result of the contravention; and
 - (k) any other information required by the Director in writing.

Record keeping and information availability

- 13(1) A person who carries out an outfall structure activity must:
- (a) create;
 - (b) compile; and
 - (c) retain
- the following records:
- (i) the names, addresses and phone numbers of the owners of the outfall structure and of the person carrying out the outfall structure activity,
 - (ii) a copy of the plan prepared for the outfall structure pursuant to section 6,
 - (iii) any as-built plans or as-constructed plans, if such as built or as constructed plans were prepared,
 - (iv) the time period over which the carrying out of the outfall structure activity occurred, including:
 - (A) the start and completion dates; and
 - (B) the duration of time each day that the outfall structure activity occurred in the water body,
 - (v) photographs or video-recordings taken of the outfall structure before, during and after the carrying out of the outfall structure activity,

- (vi) where written specifications of a qualified aquatic environment specialist have been included in the plan, the curriculum vitae and relevant experience of the qualified aquatic environment specialist, and
 - (vii) a copy of all certifications referred to in section 11.
- (2) A person who carries out an outfall structure activity must meet the following time requirements for the preparation or compilation of the records specified in subsection (1), unless otherwise specified in writing by the Director:
- (a) a plan under section 6 must be prepared prior to providing notice to the Director under section 3;
 - (b) the curriculum vitae and relevant experience of the qualified aquatic environment specialist must be compiled prior to providing notice to the Director under section 3;
 - (c) for records referred to in paragraphs (i), (iii), (iv) and (v) of subsection (1), the records must be compiled within 3 months of completion of the outfall structure activity or within another time period specified in writing by the Director; and
 - (d) for certifications referred to in paragraph (vii) of subsection (1), records must be compiled within the time periods specified in section 11.
- (3) A person who carries out an outfall structure activity must retain all records referred to in subsection (1) for one year after the completion of the removal of the outfall structure.
- (4) A person who carries out an outfall structure activity must, within the time period specified in writing by the Director or an inspector, provide to the Director or an inspector, any requested information or records retained under subsection (1).

Monitoring of the outfall structure

- 14 Until the outfall structure has been removed, the person who carried out an outfall structure activity must monitor the compliance of an outfall structure with this Code of Practice, in accordance with the plan prepared under section 6.

Code of Practice review and amendment

- 15 The Department may institute a review and amendment of this Code of Practice at any time.

SCHEDULE 1

**Notice to the Director
(Section 3)**

The following information must be contained in a notice for the purposes of section 3:

- (a) type of outfall structure and the nature of the outfall structure activity that is to be undertaken;
- (b) the name, address and phone number of at least one owner of the outfall structure;
- (c) the name and phone number of the contact person for the person carrying out the outfall structure activity;
- (d) a map, diagram, or air photo that shows the outfall structure location in relation to the boundaries of the quarter section that the outfall is located in, including the legal description of the land and the name of the water body (if named) on which the outfall structure is located, and the UTM coordinates, if available, of the outfall structure location;
- (e) the diameter of the outfall structure pipe and the designed discharge capacity of the outfall structure;
- (f) the substances to be discharged from the outfall structure;
- (g) the construction methods and conditions determined in accordance with sections 9 and 10 and Schedule 3 that will be used in carrying out the outfall structure activity, including, where applicable, the rationale for the proposed construction method;
- (h) whether the outfall structure activity to be carried out will incorporate the specifications prepared by a qualified aquatic environment specialist, and if so, the name of the qualified aquatic environment specialist, and consulting company name, if applicable;
- (i) the expected commencement and completion dates of the outfall structure activity, including the estimated duration of time that the outfall structure activity will be carried out in a water body; and
- (j) whether structures or other measures will be required to meet clause (a) in Part 1 of Schedule 2.

SCHEDULE 2

**Plans
(Section 6)**

**PART 1
DESIGN AND CONSTRUCTION STANDARDS**

The following standards must be met for the purposes of this Code of Practice:

- (a) Upon completion of the outfall structure activity, the:
 - 1. quantity, and
 - 2. productive capacityof the aquatic environment, including, but not limited to fish habitat, at and adjacent to the outfall structure site must be equivalent to or exceed that which existed prior to commencing the outfall structure activity;
- (b) Upon completion of the outfall structure activity, the:
 - 1. hydraulic,
 - 2. hydrologic, and
 - 3. hydrogeologicalcharacteristics of the water body must be restored to a condition that is equivalent to the condition that existed prior to commencing the outfall structure activity;
- (c) The outfall structure activity must be carried out in a manner so that none of the following occurs:
 - 1. harm to fish or fish eggs,

2. destruction of fish or fish eggs,
 3. harmful alteration, disruption or destruction of fish habitat;
- (d) the flow of water in the water body past the outfall structure site must be maintained at the outfall structure site at all times;
 - (e) measures must be implemented to minimize the duration and amount of disturbance of the bed and banks of the water body;
 - (f) no substance or material that may have an adverse effect on the aquatic environment shall be deposited into the water body;
 - (g) the outfall structure activity shall not result in the transfer to the outfall structure site of biota that is not indigenous to the environment at the outfall structure site;
 - (h) the person carrying out the outfall structure activity must take all measures possible to control:
 1. erosion of, or
 2. sedimentation intothe water body;
 - (i) debris disposal, cleanup and initial stabilization must be carried out as part of the outfall structure activity; and
 - (j) all areas on the outfall structure site:
 1. that have been disturbed by the outfall structure activity, and
 2. that slope to the water bodymust be stabilized within one full growing season after the completion of the outfall structure activity.

PART 2
REQUIREMENTS FOR INFORMATION AND WRITTEN SPECIFICATIONS
FOR PLANS OF OUTFALL STRUCTURE ACTIVITY

Written specifications of a professional engineer required under section 6(1) must:

- (a) be prepared, signed and stamped by a professional engineer;
- (b) incorporate any written specifications prepared by a qualified aquatic environment specialist for the outfall structure activity;
- (c) include the certification by that professional engineer that the design specifications meet the design and construction standards in Schedule 2 of this Code of Practice; and
- (d) include the design specifications of the outfall structure activity and other information related to the outfall structure activity, as follows:
 - (i) information on a page which is a minimum size of 21 centimetres by 27 centimetres, a minimum scale of 1:15000 and that includes:
 - (A) a map, diagram, or air photo that shows the location of the outfall structure activity in relation to the boundaries of the quarter section that the outfall structure will be located in, the legal description of the land, and the UTM coordinates, if available, on which the outfall structure is located;
 - (B) the name of the water body that the outfall structure is or will be located on, if named;
 - (C) whether the outfall structure will carry storm drainage or wastewater;
 - (D) the location of the pipe connecting to the outfall structure shown through the width of the active floodplain of the water body, including pipe diameter and outfall structure discharge capacity; and
 - (E) all surveyed and unsurveyed profile and cross-sectional drawings required for the design;
 - (ii) any hydraulic, hydrologic, or hydrogeologic analysis performed for the design of the outfall structure, and
 - (iii) a description of any other specifications for the outfall structure that were not provided on the plan or that are required in order to comply with this Code of Practice.

SCHEDULE 3

**Construction Conditions
(Section 9)**

**PART 1
CLASS A WATER BODIES**

Where a map or section 7 of this Code of Practice designates the water body in which the proposed outfall structure is or will be located as a Class A water body, the construction methods and conditions specified in section 9 and 10 of this Code of Practice must be met.

**PART 2
GENERAL CONDITIONS FOR OUTFALL STRUCTURE ACTIVITIES IN
CLASS B, C AND D WATER BODIES**

- (a) If a water body is flowing at the time of the outfall structure activity, the water body channel must not be constricted by more than two-thirds (2/3) of its width during the carrying out of an outfall structure activity;
- (b) Where any excavation of the bank of a water body occurs:
 - (i) all material excavated from the bed or banks of the water body must be removed and stored at a location out of the water body until the materials are removed from the location or backfilled into the water body,
 - (ii) where the width of the outfall structure site measured between the banks of the water body is equal to or greater than 15 metres, and it is necessary to stockpile the material excavated from the bed in the water body, the material must be stockpiled in a manner that avoids areas of highest water velocity, and does not windrow the material across the channel perpendicular to the flow of water,
- (c) Where isolating the location of a works:
 - (i) the isolation must be carried out in a manner that isolates the location of the outfall structure activity from the flowing water in the water body, and eliminates the flow of surface water through the construction site,
 - (ii) any berms, cofferdams or other isolation structures used in an outfall structure activity within a flowing watercourse are to be:
 - (A) constructed of non-erodible material or protected from erosion for the entire period of time the berm, coffer dam or isolation structure will be in place; and
 - (B) removed completely upon completion of the outfall structure activity,
 - (iii) in cases where the entire flow of water of a water body is diverted around the outfall structure site, it must be returned to the water body downstream of the outfall structure site,
 - (iv) where ice is present on a water body, any diverted water must be returned to the water body downstream of the outfall structure site, under the ice if ice is present,
 - (v) silt fences may be used in situations where there is low flow in a water body, where appropriate, to isolate the construction area from the water body,
 - (vi) during the carrying out of the outfall structure activity, any fish that are found within the isolated portion of the outfall structure site are to be removed, without harm to or destruction of the fish, to an area of the water body immediately adjacent to the watercourse crossing, outside the isolated portion of the outfall structure site,

- (vii) during a restricted activity period, when fish are spawning or migrating, an isolation method that blocks the entire width of a water body must not be in place for longer than 3 consecutive days, unless upstream and downstream fish migration is accommodated,
- (viii) during a period of time outside a restricted activity period, an isolation method must not be in place for longer than 14 consecutive days unless upstream and downstream fish migration is accommodated,
- (ix) any water entering an intake of a bypass pumping system must pass through a screen with openings that are no larger than 2.54 millimetres and at a velocity that does not result in the entrainment and entrapment of fish or fish fry,
- (x) any accumulations of silt and sediment within the isolation area resulting from the works in the isolation area must be removed to an upland site prior to restoration of water flow through the isolation site, and
- (xi) any water removed from an isolation area, must be discharged in a manner that ensures suspended sediments are not introduced into a water body.

PART 3
CLASS B WATER BODIES – ISOLATION METHOD

Where a map or section 7 of this Code of Practice designates the water body in which the proposed outfall structure is or will be located as a Class B water body, in addition to the requirements under section 9 and 10 of this Code of Practice:

- (a) where the isolation method is used, the following requirements must be met:
 - (i) the water diverted around the outfall structure site must be returned to the water body downstream of the outfall structure site during the outfall structure activity,
 - (ii) where ice is present on the water body, the diverted water must be returned to the water body downstream of the outfall structure site, under the ice during the outfall structure activity,
 - (iii) backfill around the outfall structure must consist solely of material of equal or better quality compared to the material that was removed,
 - (iv) all material excavated from the bed or banks of the water body must be removed and stored at a location out of the water body until the material is used to backfill, in accordance with clause (a) of Part 5 of Schedule 3,
 - (v) during the carrying out of the outfall structure activity, any fish that are found within the isolated portion of the water body shall be removed, without harm or destruction, to an area of the water body outside the construction site that is located immediately adjacent to the isolated portion,
 - (vi) during those periods of time within a restricted activity period, when fish are spawning or migrating, an isolation method must not be used for longer than three consecutive days, unless upstream and downstream fish migration is accommodated,
 - (vii) during any period of time outside a restricted activity period, an isolation method must not be in place for longer than 14 consecutive days unless upstream and downstream fish migration is accommodated,
 - (viii) any water entering an intake of an isolation bypass pumping system must pass through a screen with openings that are no larger than 2.54 millimetres and at a velocity that does not result in the entrainment and entrapment of fish or fish fry, and
 - (ix) any accumulations of silt and sediment within the isolation area in the excavation resulting from the outfall structure activity, must be

removed to a location where the materials will not enter a water body.

**PART 4
CLASS C WATER BODIES – ISOLATION METHOD**

Where a map or section 7 of this Code of Practice designates the water body in which the proposed outfall structure is or will be located as a Class C water body, in addition to the requirements under section 9 and 10 of this Code of Practice, the following requirements must be met:

- (a) where the isolation method is used:
 - (i) the isolation method must be carried out in a manner that isolates the instream construction site and eliminates the flow of surface water through the area of the excavation or will be excavated in the water body,
 - (ii) the water diverted around the outfall site must be returned to the water body downstream of the outfall site,
 - (iii) where ice is present on the water body, the diverted water must be returned to the water body downstream of the outfall site, under the ice,
 - (iv) backfill around the structure must consist solely of material of equal or better quality compared to the material that was removed,
 - (v) during the carrying out of the outfall structure activity, any fish that are found within the isolated portion of the outfall site must be removed, without harm or destruction, to an area of the water body outside the isolated portion that is located immediately adjacent to the isolated portion,
 - (vi) during those periods of time within a restricted activity period, when fish are spawning or migrating, an isolation method must not be used for longer than three consecutive days, unless upstream and downstream fish migration is accommodated,
 - (vii) any water entering an intake of a bypass pumping system must pass through a screen with openings that are no larger than 2.54 millimetres and at a velocity that does not result in the entrainment and entrapment of fish or fish fry,
 - (viii) any accumulations of silt and sediment within the isolation area resulting from the outfall structure activity must be removed to a location where the materials will not enter a water body,
 - (ix) all material excavated from the bed or banks of the water body must be removed and stored at a location out of the water body until the materials is used to backfill, and
 - (x) all special conditions on each applicable Water Act Code of Practice Management Area map must be met.

**PART 5
CLASS D WATER BODIES (Uncoded water bodies)**

Where a map or section 7 of this Code of Practice designates a water body in which the proposed outfall structure is or will be located as a Class D water body, and where a method other than the isolation method is used, in addition to section 9 and 10 of this Code of Practice, the following requirements must be met:

- (a) the backfill around the structure must consist solely of material of equal or better quality compared to the material that was removed; and
- (b) all material excavated from the bed or banks of the water body must be removed and stored at a location out of the water body until the materials is used to backfill.

SCHEDULE 4

Qualified Aquatic Environment Specialist's Written Specifications

- 1(1) The written specifications of a qualified aquatic environment specialist referred to under this Code of Practice must include:
- (a) specifications on any measures required to meet the requirements of clause (a) in Part 1 of Schedule 2 of this Code of Practice;
 - (b) a copy of information gathered and assessments made by the qualified aquatic environment specialist regarding the aquatic environment of the water body on which the outfall structure activity will be carried out, including fish populations and habitat, in preparing the specifications, including but not limited to:
 - (i) a list of all existing information, published and unpublished reports reviewed,
 - (ii) any new information gathered through field assessments, and
 - (iii) any reports prepared by the qualified aquatic environment specialist;
 - (c) the outfall location, including its legal description, and its UTM coordinates, where known;
 - (d) a summary of physical and biological data pertaining to the water body at the outfall structure location including:
 - (i) all fish species that are present or could be present at any time during the year,
 - (ii) aquatic species of special concern, including rare, endangered, threatened or vulnerable species,
 - (iii) a description of existing aquatic and riparian fish habitat,
 - (iv) a description of the hydrological characteristics of the water body, and
 - (v) any other relevant information regarding the aquatic environment, including fish populations and habitat;
 - (e) a description of any field assessment study sites, the methods used during field assessments and dates and times of field assessments;
 - (f) a description of the anticipated effects of the outfall structure activity on the water body and aquatic environment; and
 - (g) the name and signature of the qualified aquatic environment specialist and of the persons responsible for the field assessments.
- (2) A field assessment for outfall structures must be conducted:
- (a) where in the opinion of the qualified aquatic environment specialist, the required information does not exist to prepare the written specifications in order to meet the requirements of clause (a) in Part 1 of Schedule 2, including where:
 - (i) an alternative construction method to that specified in section 9(1) of this Code of Practice is to be used, and
 - (ii) when an outfall structure activity occurs or is anticipated to occur in a water body during a period of fish spawning, egg incubation, fry emergence and early fry development; and
 - (b) when repair or maintenance of an existing outfall structure is carried out in a Class A water body.

CODE OF PRACTICE FOR WASTEWATER SYSTEMS CONSISTING SOLELY OF A WASTEWATER COLLECTION SYSTEM
[made under the *Environmental Protection and Enhancement Act*, RSA 2000, c.E-12 and the *Wastewater and Storm Drainage Regulation*, A.R. 119/93]

September 2003

TABLE OF CONTENTS

- Part
1. Definitions
 2. General Provisions
 3. Administration, Design and Construction Requirements
 4. Operational Requirements
 5. Monitoring Requirements
 6. Reclamation Requirements
 7. Reporting Requirements
 8. Record Keeping Requirements
 9. Code of Practice Administration

PART 1: DEFINITIONS

- 1.1 All definitions in the Act and the regulations apply except where expressly defined in this Code of Practice.
- 1.2 In this Code of Practice:
 - (a) “Act” means the *Environmental Protection and Enhancement Act*, R.S.A. 2000, c.E-12, as amended from time to time;
 - (b) “grab” means, when referring to a sample, an individual sample collected in less than 30 minutes and which is representative of the substance sampled;
 - (c) “low pressure wastewater collection system” means a wastewater collection system from which domestic wastewater is discharged periodically into a pressure main by means of a grinder pump capable of grinding the solids in the wastewater;
 - (d) “professional engineer” means a professional engineer or registered professional technologist (engineering) under the *Engineering, Geological and Geophysical Professions Act*;
 - (e) “regulations” means the regulations under the Act;
 - (f) “this Code of Practice” means the *Code of Practice for Wastewater Systems Consisting Solely of a Wastewater Collection System*; and

- (g) “vacuum wastewater collection system” means a wastewater collection system from which domestic wastewater is discharged periodically into a vacuum main, which maintains a vacuum in the system.

PART 2: GENERAL PROVISIONS

- 2.1.1 Any person who constructs, operates or reclaims a wastewater system consisting solely of a wastewater collection system that discharges into a wastewater system authorized under the Act, must do so in accordance with this Code of Practice.
- 2.1.2 Any conflict between the registration application and the terms and conditions of this Code of Practice shall be resolved in favour of this Code of Practice.
- 2.1.3 The terms and conditions of this Code of Practice do not affect any rights or obligations created under any other authorization issued or adopted by Alberta Environment.
- 2.1.4 The terms and conditions of this Code of Practice are severable. If any term or condition of this Code of Practice is held invalid, the application of such term or condition to the other circumstances and the remainder of this Code of Practice shall not be affected by that invalidity.
- 2.1.5 If the registration holder monitors for any substances or parameters which are the subject of limits in this Code of Practice more frequently than is required, using procedures authorized in this Code of Practice, then the registration holder shall provide the results of such monitoring as an addendum to the next report required by this Code of Practice.

Section 2.2: Analytical Requirements

- 2.2.1 With respect to any sample required to be taken pursuant to this Code of Practice, all samples shall be:
- (a) collected;
 - (b) preserved;
 - (c) stored;
 - (d) handled; and
 - (e) analyzed
in accordance with:
 - (i) the *Standard Methods for the Examination of Water and Wastewater*, published by the American Public Health Association, the American Waterworks Association and the Water Environment Federation, as amended or replaced from time to time,
 - (ii) the *Methods Manual for Chemical Analysis of Water and Wastes*, published by the Alberta Research Council, as amended or replaced from time to time, or
 - (iii) a method authorized in writing by the Director.
- 2.2.2 Any analysis of a sample required pursuant to this Code of Practice shall be done only in an approved laboratory, unless otherwise specified in writing by the Director.

PART 3: ADMINISTRATION, DESIGN AND CONSTRUCTION REQUIREMENTS

- 3.1.1 An application for a registration of a wastewater collection system shall contain, at a minimum, all of the following information:

- (a) engineering design drawings and specifications for the wastewater system, including the design capacity, stamped and signed by a professional engineer;
- (b) for low pressure wastewater collection systems or vacuum wastewater collection systems, the written opinion of a professional engineer regarding the adequacy of the design of the wastewater system, based, at a minimum, on the designed hydraulic capability of the wastewater system;
- (c) a statement, signed and sealed by a professional engineer:
 - (i) indicating whether the design of the project complies with all design requirements of this Code of Practice, and the regulations, and
 - (ii) in cases in which a design requirement is not met, identifying and justifying the deviation; and
- (d) any other information required by the Director in writing.

PART 4: OPERATIONAL REQUIREMENTS

- 4.1.1 No release from the wastewater collection system to the environment is permitted.
- 4.1.2 At all times, the operation of the wastewater collection system shall be performed by, or under the direction of, a person who holds a valid wastewater collection certificate of qualification at the applicable level as set out in Table 4-1.

TABLE 4-1: MINIMUM WASTEWATER COLLECTION SYSTEM OPERATOR CERTIFICATE OF QUALIFICATION REQUIREMENTS

Population Served	Minimum Wastewater Collection (WWC) Operator Certificate of Qualification Required
Less than 500	One operator with a Small System Certificate
501 to 1,500	One operator with a Level 1 Wastewater Collection (WWC) Certificate
1,501 to 15,000	One operator with a Level 2 Wastewater Collection (WWC) Certificate
15,001 to 50,000	One operator with a Level 3 Wastewater Collection (WWC)
More than 50,000	One operator with a Level 4 Wastewater Collection (WWC)

PART 5: MONITORING REQUIREMENTS

- 5.1.1 In the event of an unauthorized release into the environment from the wastewater collection system:
 - (a) all steps possible must be taken to stop the release;
 - (b) all steps possible must be taken to mitigate all adverse effects of the release; and
 - (c) the unauthorized release from the wastewater collection system shall be monitored in accordance with Table 5-1, if any portion of that unauthorized release may enter or has entered a watercourse.

TABLE 5-1: UNAUTHORIZED RELEASE MONITORING REQUIREMENTS

Parameters	Sample Type	Monitoring Location	Minimum Monitoring Frequency and Minimum Number of Samples
5 day Biochemical Oxygen demand	Grab	At the release point, before any dilution	One Sample during the unauthorized release
Total Suspended Solids			
Ammonia-Nitrogen			
Total Coliform			
Fecal Coliform			

- 5.1.2 In addition to the monitoring required in 5.1.1, in the event of an unauthorized release, the total volume of any unauthorized release from the wastewater collection system into the environment shall be:
- (a) measured, or if measurement is not possible, estimated; and
 - (b) recorded.

PART 6: RECLAMATION REQUIREMENTS

- 6.1.1 Where the land surface has been disturbed during construction, expansion, modification or repair of any portion of the wastewater collection system, reclamation of the land surface to equivalent land capability shall be performed following the construction, expansion, modification or repair, in accordance with *Standards and Guidelines for Municipal Waterworks, Wastewater and Storm Drainage Systems*, published by the Department, as amended or replaced from time to time.
- 6.1.2 At least six months prior to the wastewater collection system permanently ceasing operation, the Director shall be informed in writing of the intention to cease the operation.
- 6.1.3 Within six months after the wastewater collection system permanently ceases operation, the registration holder shall submit to the Director a reclamation plan.
- 6.1.4 The reclamation plan shall contain, at a minimum, the following information:
- (a) a proposal for reclaiming all disturbed land to equivalent land capability; and
 - (b) any other information required by the Director in writing.
- 6.1.5 Any person conducting reclamation shall do so in accordance with the reclamation plan as authorized in writing by the Director.

PART 7: REPORTING REQUIREMENTS

Contravention Reporting

- 7.1.1 In addition to any other reporting required under the Act, the regulations and this Code of Practice, the registration holder shall immediately report any contravention of this Code of Practice to the Director, either:
- (a) by telephone at (780) 422-4505; or
 - (b) by a method:
 - (i) in accordance with the release reporting provisions in the Act and regulations, or
 - (ii) authorized in writing by the Director.
- 7.1.2 In addition to any other reporting required pursuant to the Act or the regulations, where a contravention is reported under 7.1.1, the registration holder shall provide a report to the Director:
- (a) in writing; or
 - (b) by a method:
 - (i) in accordance with the release reporting provisions in the Act and regulations, or
 - (ii) authorized in writing by the Director
- within seven (7) calendar days after the discovery of the contravention or within another time period specified in writing by the Director, unless the requirement for the report is waived by the Director.
- 7.1.3 The report required in 7.1.2 shall contain, at a minimum, the following information:
- (a) a description of the contravention;
 - (b) the date of the contravention;
 - (c) the duration of the contravention;
 - (d) the legal land description of the location of the contravention;
 - (e) an explanation as to why the contravention occurred;
 - (f) a summary of all preventive measures and actions that were taken prior to the contravention;
 - (g) a summary of all measures and actions that were taken to mitigate any effects and potential effects related to the contravention;
 - (h) a summary of all measures that will be taken to address the remaining effects and potential effects related to the contravention;
 - (i) the number of the registration issued under the Act for the wastewater system and the name of the person who held the registration at the time the contravention occurred;
 - (j) the name, address, phone number and responsibilities of the person operating the wastewater collection system at the time the contravention occurred;
 - (k) the name, address, phone number and responsibilities of all persons who had charge, management or control of the wastewater collection system at the time that the contravention occurred;
 - (l) a summary of proposed measures that will prevent future contraventions, including a schedule of implementation for these measures;
 - (m) any information that was maintained or recorded under this Code of Practice, as a result of the incident; and
 - (n) any other information required by the Director in writing.

PART 8: RECORD KEEPING REQUIREMENTS

- 8.1.1 The registration holder shall:
- (a) record; and
 - (b) maintain for the life of the wastewater collection system:

- (i) a copy of all registrations and authorizations issued under the Act regarding the wastewater collection system,
- (ii) all documentation informing the Director regarding all extensions and replacements of any portion of the wastewater collection system,
- (iii) a copy of all documentation informing the Director of a contravention, as required under 7.1.2 and 7.1.3,
- (iv) a copy of all inspection reports issued by the Department regarding the wastewater collection system,
- (v) the current version of the design for the wastewater collection system,
- (vi) operating procedures for the wastewater collection system,
- (vii) a copy of the reclamation plan as required in 6.1.2 and 6.1.3, and
- (viii) a record of all past and current certified operators, including updates.

PART 9: CODE OF PRACTICE ADMINISTRATION

- 9.1.1 This Code of Practice will be reviewed as changes in technological or other standards warrant.

CODE OF PRACTICE FOR A WATERWORKS SYSTEM CONSISTING SOLELY OF A WATER DISTRIBUTION SYSTEM [made under the *Environmental Protection and Enhancement Act, RSA 2000, c.E-12, as amended and the Environmental Protection and Enhancement (Miscellaneous) Regulation, AR 118/93, as amended*]

PART 1: DEFINITIONS

- 1.1 All definitions in the Act and the regulations under the Act apply except where expressly defined in this Code of Practice.
- 1.2 In this Code of Practice:
- (a) "Act" means the *Environmental Protection and Enhancement Act*, R.S.A. 2000, c.E-12, as amended from time to time;

- (b) “continuous” means flow measurement or sample analysis through in-line equipment that creates flow measurements or frequent, discrete sample analysis output;
- (c) “design capacity” means a production capacity for which the waterworks system was designed, as stated in the engineering drawings and specifications for the waterworks system, provided pursuant to 3.1.3;
- (d) “disinfection” means the chemical or physical process of treating water to inactivate microorganisms;
- (e) “GCDWQ” means the *Guidelines for Canadian Drinking Water Quality*, published by Health Canada, as amended or replaced from time to time;
- (f) “grab”, when referring to a sample, means an individual sample collected in less than 30 minutes and which is representative of the substance sampled;
- (g) “IMAC” means the Interim Maximum Acceptable Concentration specified in the GCDWQ for a particular parameter;
- (h) “MAC” means the Maximum Acceptable Concentration, specified in the GCDWQ for a particular parameter;
- (i) “professional engineer” means a professional engineer or registered professional technologist (engineering) under the *Engineering, Geological and Geophysical Professions Act*;
- (j) “regulations” means the regulations under the Act;
- (k) “Standards and Guidelines Document” means the *Standards and Guidelines for Municipal Waterworks, Wastewater and Storm Drainage Systems*, published by the Department, as amended or replaced from time to time; and
- (l) “this Code of Practice” means the *Code of Practice for a Waterworks System Consisting Solely of a Water Distribution System*, published by the Department, as amended or replaced from time to time.

PART 2: GENERAL PROVISIONS

Section 2.1: General

- 2.1.1 Any person who constructs, operates or reclaims a waterworks system that consists solely of a water distribution system must do so in accordance with this Code of Practice.
- 2.1.2 Any conflict between the registration application and the terms and conditions of this Code of Practice shall be resolved in favour of this Code of Practice.
- 2.1.3 The terms and conditions of this Code of Practice do not affect any rights or obligations created under any other authorization issued by the Department.
- 2.1.4 The terms and conditions of this Code of Practice are severable. If any term or condition of this Code of Practice or the application of any term or condition is held invalid, the application of such term or condition to other circumstances and to the remainder of this Code of Practice shall not be affected by that invalidity.
- 2.1.5 If the registration holder monitors for any substances or parameters which are the subject of limits in this Code of Practice more frequently than is required, using procedures authorized in this Code of Practice, then the registration holder shall provide the results of such monitoring as an addendum to the reports required by this Code of Practice.

Section 2.2: Analytical Requirements

- 2.2.1 With respect to any monitoring required pursuant to this Code of Practice, all samples shall be:
- (a) collected;
 - (b) preserved;
 - (c) stored;
 - (d) handled; and
 - (e) analyzed
- in accordance with:
- (i) the *Standard Methods for the Examination of Water and Wastewater*, published by the American Public Health Association, the American Waterworks Association and the Water Environment Federation, as amended or replaced from time to time,
 - (ii) the *Methods Manual for Chemical Analysis of Water and Wastes*, published by the Alberta Research Council, as amended or replaced from time to time, or
 - (iii) a method authorized in writing by the Director.
- 2.2.2 Any analysis of a sample required pursuant to this Code of Practice, shall be done only in an approved laboratory, unless otherwise specified in writing by the Director.
- 2.2.3 Any analysis of a sample for bacteriological quality required pursuant to this Code of Practice shall be conducted only by the Alberta Provincial Laboratory for Public Health, unless otherwise specified in writing by the Director.

PART 3: ADMINISTRATION, DESIGN AND CONSTRUCTION REQUIREMENTS

Operations Program

- 3.1.1 No person shall apply for a registration unless that person has prepared or caused to be prepared a written operations program governing the operation of the water distribution system.
- 3.1.2 The operations program in 3.1.1 shall contain, at a minimum, all of the information in Schedule 1.
- 3.1.3 In addition to the information required under the Act and the regulations, an application for a registration shall contain, at a minimum, the following information:
- (a) written confirmation that the person applying for the registration has prepared, or caused to be prepared an operations program;
 - (b) engineering drawings signed and stamped by a professional engineer, for the proposed water distribution system or proposed changes to the water distribution system, including the design capacity of the proposed water distribution system or proposed change;
 - (c) a statement, signed and stamped by a professional engineer, indicating whether the design of the project complies with the design requirements of:
 - (i) this Code of Practice, and
 - (ii) the regulations under the Act; and
 - (d) in cases in which a design requirement in clause (c) is not met, a statement, signed and stamped by a professional engineer, identifying and justifying the deviation.
- 3.1.4 No person shall install any treatment equipment that was not included in the registration application unless the Director has been advised in writing in advance of the intention to install that treatment equipment.

PART 4: OPERATIONAL REQUIREMENTS

- 4.1.1 The water distribution system shall be:
 - (a) operated; and
 - (b) maintained
 at all times within its design capacity.
- 4.1.2 The registration holder shall maintain a minimum pressure of 150 kPa at all points in the water distribution system, at all times.
- 4.1.3 The registration holder shall prevent any structural or equipment malfunction in the water distribution system that may affect the quality or distribution of potable water.

Certified Operator

- 4.1.4 At all times, the operation of the water distribution system shall be performed by, or under the direction of, a person who holds a valid certificate of qualification at the applicable level as set out in Table 4-1.
- 4.1.5 At all times, the number of certified operators available to perform or direct the operation of the water distribution system must meet or exceed the applicable numbers in Table 4-1.

TABLE 4-1: MINIMUM WATER DISTRIBUTION SYSTEM OPERATOR CERTIFICATE OF QUALIFICATION REQUIREMENTS

Population Served by Water Distribution System	Minimum Number and Minimum Qualifications of Water Distribution Certified Operator(s)
<500	One operator with a Small Water Systems Certificate
500 - 1,500	One operator with a Level I Water Distribution (WD) Certificate
1,501 - 15,000	One operator with a Level II Water Distribution (WD) Certificate
15,001 - 50,000	One operator with a Level III Water Distribution (WD) Certificate, and One operator with a Level II Water Distribution (WD) Certificate
50,001 and over	One operator with a Level IV Water Distribution (WD) Certificate, and Two operators with a Level III Water Distribution (WD) Certificate, and One operator with a Level II Water Distribution (WD) Certificate

PART 5: LIMITS AND MONITORING REQUIREMENTS

- 5.1.1 The quality of potable water produced by the waterworks system must comply with the limits in Table 5-1:
 - (a) at all locations; and

(b) at all times.

TABLE 5-1: POTABLE WATER QUALITY LIMITS

Parameter	Limit
The bacteriological, physical, inorganic and organic chemical and pesticide parameters listed in the Compliance Monitoring section of the Standards and Guidelines Document, except fluoride	Applicable MAC or IMAC
Total chlorine	Greater than or equal to 0.1 mg/L
Fluoride	Less than or equal to 2.4 mg/L

- 5.1.2 Compliance with the MAC or IMAC for inorganic and organic chemical and pesticide parameters is determined by a running annual average of all the samples taken at any sampling point.
- 5.1.3 Where a sample does not meet one or more of the bacteriological quality limits in Table 5-1, in addition to any reporting or other requirements pursuant to the Act, the regulations, or this Code of Practice, the registration holder shall carry out the corrective actions set out in the *Communication and Action Protocol for Failed Bacteriological Results in Drinking Water for Waterworks Systems Authorized under the Environmental Protection and Enhancement Act*, entered into by Alberta Environment, the Alberta Provincial Laboratory for Public Health, and Alberta Health and Wellness, as amended or replaced from time to time.

Potable Water Monitoring

- 5.1.4 The potable water shall be monitored in accordance with Table 5-2, unless otherwise specified in writing by the Director.

TABLE 5-2: POTABLE WATER MONITORING LOCATION AND FREQUENCY

Parameters	Sample Type	Monitoring Location	Minimum Monitoring Frequency and Minimum Number of Samples
Bacteriological quality	Grab	At random location(s) within the water distribution system	The frequency and number of samples as set out in the GCDWQ, without any reduction
Total chlorine	Grab	At random location within the water distribution system and	One sample per day, five days per week; if a statutory holiday falls on a monitoring day within that week, monitoring is not required on that day and
		At the same locations as the bacteriological quality sample is collected	One sample, taken at the same time and frequency as the bacteriological quality sample is collected
The physical, inorganic and organic chemical and pesticide parameters listed in the Compliance Monitoring section of the Standards and Guidelines Document, except total chlorine and trialomethanes	Grab	At random location downstream of any storage reservoir, within the water distribution system	One sample taken once every three years

5.1.5 In the event of a repair within the water distribution system, in addition to the monitoring required in 5.1.4, the registration holder shall monitor for:

- (a) bacteriological quality; and
 - (b) total chlorine
- by grab sample, in the following manner:
- (i) immediately after each repair, and

- (ii) at a point closest to the location of the repair.

Trihalomethanes

- 5.1.6 In addition to any other monitoring requirements pursuant to this Code of Practice, the Act or the regulations, trihalomethanes shall be monitored in water distribution systems in the following manner:
- (a) for water distribution systems serving a population of:
 - (i) ten thousand or more people:
 - (A) three grab samples shall each be taken at a random location in the water distribution system;
 - (B) one grab sample shall be taken at the location in the water distribution system furthest away from treatment; and
 - (C) all four samples shall be taken within a 24 hour time period; or
 - (ii) less than ten thousand people, one grab sample shall be collected at the location in the water distribution system furthest away from treatment; and
 - (b) all samples shall be analyzed for trihalomethanes.
- 5.1.7 All monitoring required in 5.1.6 shall be conducted once every three months.
- 5.1.8 Despite 5.1.7, if the trihalomethanes results from the previous four (4) monitoring events are all less than the applicable MAC or IMAC, subsequent monitoring shall be conducted, at a minimum, in the following manner:
- (a) for water distribution systems serving a population of:
 - (i) ten thousand or more people:
 - (A) at least one grab sample shall be collected at the location in the water distribution system furthest away from treatment; and
 - (B) the monitoring frequency shall be at least once a year, unless otherwise authorized in writing by the Director; or
 - (ii) less than ten thousand people:
 - (A) at least one sample shall be collected at the location in the water distribution system furthest away from treatment; and
 - (B) the monitoring frequency shall be at least once every three years, unless otherwise authorized in writing by the Director;
 - and
 - (b) all samples shall be analyzed for trihalomethanes.
- 5.1.9 If any trihalomethanes result exceeds the applicable MAC or IMAC, monitoring pursuant to 5.1.7 shall be continued.

Additional Measurements

- 5.1.10 The water volume from the source of water supply shall be measured each day, five days a week; if a statutory holiday falls on a monitoring day within that week, monitoring is not required on that day.
- 5.1.11 Where any treatment chemical is added to the waterworks system, the daily dosage of each chemical added:
- (a) shall be calculated in milligrams of chemical per litre of water; and
 - (b) shall not exceed the dosage specified as Maximum Use in *Standard 60*, published by the National Sanitation Foundation and the

American National Standards Institute (NSF/ANSI), as amended or replaced from time to time, unless otherwise authorized in writing by the Director.

PART 6: RECLAMATION REQUIREMENTS

- 6.1.1 Where the land surface has been disturbed during construction, expansion, modification or repair of any portion of a water distribution system, reclamation of the land surface to equivalent land capability shall be performed following the construction, expansion, modification or repair, in accordance with the Standards and Guidelines Document.
- 6.1.2 Within six months after the water distribution system permanently ceases operation, the registration holder shall submit a reclamation plan to the Director.
- 6.1.3 No person shall commence reclamation of the water distribution system until that person has received written authorization from the Director for the reclamation.
- 6.1.4 Any person conducting reclamation of the water distribution system shall comply with the reclamation plan, as authorized in writing by the Director.

PART 7: REPORTING REQUIREMENTS

Contravention Reporting

- 7.1.1 In addition to any other reporting required pursuant to this Code, the Act, or the regulations, the registration holder shall immediately report to the Director any contravention of this Code of Practice, either:
 - (a) by telephone at (780) 422-4505; or
 - (b) by a method:
 - (i) in compliance with the release reporting provisions of the Act and the regulations, or
 - (ii) authorized in writing by the Director.
- 7.1.2 In addition to any other reporting required pursuant to this Code, the Act, the regulations, the registration holder shall immediately report to the Director by a method under 7.1.1, any structural or equipment malfunction in the water distribution system that may affect the quality or supply of potable water.
- 7.1.3 In addition to the immediate report in 7.1.1, the registration holder shall provide a report to the Director:
 - (a) in writing; or
 - (b) by a method:
 - (i) in compliance with the release reporting provisions of the Act and the regulations, or
 - (ii) authorized in writing by the Directorwithin seven (7) calendar days after the discovery of the contravention, or within another time period specified in writing by the Director, unless the requirement for the report is waived by the Director.
- 7.1.4 The report required under 7.1.3 shall contain, at a minimum the following information:
 - (a) a description of the contravention;
 - (b) the date of the contravention;
 - (c) the duration of the contravention;
 - (d) the legal land description of the location of the contravention;
 - (e) an explanation as to why the contravention occurred;

- (f) a summary of all preventive measures and actions that were taken prior to the contravention;
- (g) a summary of all measures and actions that were taken to mitigate any effects of the contravention;
- (h) a summary of all measures that will be taken to address any remaining effects and potential effects related to the contravention;
- (i) the number of the registration issued under the Act for the water distribution system, and the name of the person who held the registration at the time the contravention occurred;
- (j) the name, address, phone number and responsibilities of all persons operating the water distribution system at the time the contravention occurred;
- (k) the name, address, phone number and responsibilities of all persons who had charge, management or control of the water distribution system at the time that the contravention occurred;
- (l) a summary of proposed measures that will prevent future contraventions, including a schedule of implementation for these measures;
- (m) any information that was maintained or recorded under this Code of Practice, as a result of the incident; and
- (n) any other information required by the Director in writing.

Monthly Reporting

7.1.5 The registration holder shall compile monthly reports.

7.1.6 The monthly report in 7.1.5 shall include, at a minimum:

- (a) the name and telephone number of all certified operators;
- (b) the analytical results for all parameters required to be monitored in accordance with this Code of Practice during the month;
- (c) the locations of all sampling performed during the month in accordance with this Code of Practice;
- (d) the name and manufacturer of all treatment chemicals added during the month, and each manufacturer as listed in the *Standard 60*, published by the American National Standards Institute and the National Sanitation Foundation, (ANSI/NSF) as amended or replaced from time to time; and
- (e) the results of all required measurements conducted during the month in accordance with this Code of Practice.

Annual Reporting

7.1.7 In addition to any other reporting required under the Act, the regulations, and this Code of Practice, the registration holder shall submit to the Director an annual report, by February 28 of the year following the calendar year in which the information on which the report is based was collected.

7.1.8 The annual report in 7.1.7 shall contain, at a minimum, all of the following information:

- (a) a summary of the monthly reports, specifying the monthly minimum, average, and maximum results for each parameter monitored;
- (b) the results of any other compliance monitoring done during the year that was not included in any monthly report; and
- (c) a description of any problems experienced and corrective actions taken at the water distribution system during the year with respect to environmental matters.

Electronic Reporting

- 7.1.9 The Director may, by notice in writing, require the registration holder to submit periodic reports:
- (a) in an electronic format; and
 - (b) more frequently than specified in 7.1.5 and 7.1.7 of this Code of Practice.
- 7.1.10 The registration holder who receives a notice as specified in 7.1.9 shall comply with the notice.

PART 8: RECORD KEEPING REQUIREMENTS

- 8.1.1 The registration holder shall:
- (a) record the following information; and
 - (b) maintain the following records for five (5) years from the date the record was created:
 - (i) bacteriological analysis results;
 - (ii) daily records, including, but not limited to:
 - (A) flow meter readings;
 - (B) chlorine concentrations; and
 - (C) treatment chemical dosages;required under this Code of Practice,
 - (iii) all monthly reports required under this Code of Practice, and
 - (iv) records of action taken by the registration holder to correct contraventions of potable water quality limits (MAC or IMAC), including the following information for each contravention:
 - (A) name and address of the person who discovered the contravention; and
 - (B) copies of all notifications to the public.
- 8.1.2 The registration holder shall maintain the following records for the life of the water distribution system:
- (a) the operations program;
 - (b) copies of all:
 - (i) applications submitted to the Department for a registration regarding the water distribution system, and correspondence related to the registration,
 - (ii) engineering drawings and specifications,
 - (iii) project reports,
 - (iv) construction documents,
 - (v) record drawings,
 - (vi) all reports of inspections conducted by the Department,
 - (vii) all correspondence sent to the Department regarding a proposed extension of a water distribution system, replacement of a portion of a water distribution system, expansion or modification of potable water storage within the water distribution system,
 - (viii) all registrations issued under the Act for the waterworks system,
 - (ix) all annual reports, and
 - (x) all reports prepared pursuant to 7.1.3 and 7.1.4; and
 - (c) all physical, organic and inorganic chemical and pesticide analytical results required pursuant to this Code of Practice, excluding daily monitoring.
- 8.1.3 The results and records in 8.1.1(b) and 8.1.2(c) shall contain, at a minimum, all of the following information:

- (a) the date, location and time of monitoring, and the name of the person collecting the sample;
- (b) identification of the sample type, including, but not limited to whether the sample is a routine water distribution system sample, repeat sample, source or potable water sample, or other special purpose sample;
- (c) date of analysis;
- (d) laboratory name and person responsible for performing analysis;
- (e) the analytical method used; and
- (f) the results of the analysis.

8.1.4 The registration holder shall immediately provide any records, reports or data required to be created under this Code of Practice to the Director or an inspector, upon request.

PART 9: CODE OF PRACTICE ADMINISTRATION

9.1.1 This Code of Practice will be reviewed as changes in technological or other standards warrant.

Schedule 1 Operations Program Contents

- 1. Routine Operational Procedures, which shall, at a minimum, include:**
 - (a) contact name and telephone numbers for the system owner, system operator, engineering consultants and equipment suppliers;
 - (b) operating instructions:
 - (i) general description of treatment process and operating procedures,
 - (ii) performance requirements, and
 - (iii) location of equipment major controls;
 - (c) maintenance schedule; and
 - (d) general maintenance instructions for:
 - (i) treatment/process equipment,
 - (ii) monitoring equipment, and
 - (iii) pumping equipment; and
 - (e) the schedule and procedures for cleaning and flushing of the entire water distribution system, including potable water storage reservoirs.
- 2. Routine Operational Procedures for Monitoring and Analysis, which shall, at a minimum, include:**
 - (a) operational and compliance tests to be performed;
 - (b) methods used for monitoring and analysis; and
 - (c) locations of monitoring points.
- 3. Emergency Response Plan, which shall, at a minimum, include steps to be taken in the event of the following:**
 - (a) bacteriological results exceeding the prescribed limits;
 - (b) low chlorine residual;
 - (c) equipment breakdown;
 - (d) flood;
 - (e) water distribution system pipeline break and repair, and the return of the pipeline to service;
 - (f) power failure; and
 - (g) the waterworks system becoming inoperable, including steps in providing an alternate potable water supply.
- 4. Date of last update**

**CODE OF PRACTICE FOR WASTEWATER SYSTEMS USING A
WASTEWATER LAGOON [made under the *Environmental Protection and
Enhancement Act, RSA 2000, c.E-12*

4. Code of Practice Administration

PART 1: DEFINITIONS

- 1.1 All definitions in the Act and the regulations apply except where expressly defined in this Code of Practice.
- 1.2 In this Code of Practice:
 - (a) “Act” means the *Environmental Protection and Enhancement Act*, R.S.A. 2000, c.E-12, as amended from time to time;
 - (b) “designed frequency of discharge” means the number of discharges per year set out in the engineering design drawings and specifications for the wastewater lagoon and in some cases, may be zero, but does not include the withdrawal of treated wastewater for irrigation;
 - (c) “disinfection” means the chemical or physical process of treating the wastewater treatment plant discharge to inactivate microorganisms;
 - (d) “geometric mean” means the calculated n^{th} root of the product of all the sample analyses within the reporting period, where n equals the total number of samples within the reporting period, as follows:

Geometric Mean: $\sqrt[n]{S_1 S_2 S_3 \dots S_n}$

where,
 n = the total number of samples within the reporting period,
 S_1 = the 1st sample analysis value
 S_n = the n^{th} sample analysis value;

- (e) “grab” means, when referring to a sample, an individual sample collected in less than 30 minutes and which is representative of the substance sampled;
- (f) “low pressure wastewater collection system” means a wastewater collection system from which domestic wastewater is discharged periodically into a pressure main by means of a grinder pump capable of grinding the solids in the wastewater;
- (g) “park” means any common area that is accessible to the public;
- (h) “professional engineer” means a professional engineer or registered professional technologist (engineering) under the *Engineering, Geological and Geophysical Professions Act*;
- (i) “regulations” means the regulations under the Act;
- (j) “this Code of Practice” means the *Code of Practice for Wastewater Systems Using a Wastewater Lagoon*, published by the Department, as amended or replaced from time to time; and

- (k) “vacuum wastewater collection system” means a wastewater collection system from which domestic wastewater is discharged periodically into a vacuum main, which maintains a vacuum in the system.

PART 2: GENERAL PROVISIONS

- 2.1.1 Any person who constructs, operates or reclaims a wastewater system that uses a wastewater lagoon as a wastewater treatment plant, must do so in accordance with this Code of Practice.
- 2.1.2 Any conflict between the registration application and the terms and conditions of this Code of Practice shall be resolved in favour of this Code of Practice.
- 2.1.3 The terms and conditions of this Code of Practice do not affect any rights or obligations created under any other authorization issued or adopted by Alberta Environment.
- 2.1.4 The terms and conditions of this Code of Practice are severable. If any term or condition of this Code of Practice is held invalid, the application of such term or condition to other circumstances and the remainder of this Code of Practice shall not be affected by that invalidity.
- 2.1.5 If the registration holder monitors for any substances or parameters which are the subject of limits in this Code of Practice more frequently than is required, using procedures authorized in this Code of Practice, then the registration holder shall provide the results of such monitoring as an addendum to the next report required by this Code of Practice.

Section 2.2: Analytical Requirements

- 2.2.1 With respect to any sample required to be taken pursuant to this Code of Practice, all samples shall be:
- (a) collected;
 - (b) preserved;
 - (c) stored;
 - (d) handled; and
 - (e) analyzed
- in accordance with:
- (i) the *Standard Methods for the Examination of Water and Wastewater*, published by the American Public Health Association, the American Waterworks Association and the Water Environment Federation, as amended or replaced from time to time,
 - (ii) the *Methods Manual for Chemical Analysis of Water and Wastes*, published by the Alberta Research Council, as amended or replaced from time to time, or
 - (iii) a method authorized in writing by the Director.
- 2.2.2 Any analysis of a sample required pursuant to this Code of Practice shall be done only in an approved laboratory, unless otherwise specified in writing by the Director.

Section 2.3: Contravention Reporting

- 2.3.1 In addition to any reporting required under the Act, the regulations and this Code of Practice, the registration holder shall immediately report any contravention of this Code of Practice to the Director, either:
- (a) by telephone at (780) 422-4505; or

- (b) by a method:
 - (i) in accordance with the release reporting provisions in the Act and regulations, or
 - (ii) authorized in writing by the Director.

2.3.2 In addition to the immediate report in 2.3.1, the registration holder shall provide a report to the Director:

- (a) in writing; or
- (b) by a method:
 - (i) in accordance with the release reporting provisions in the Act and the regulations, or
 - (ii) authorized in writing by the Director

within seven (7) calendar days after the discovery of the contravention, or within another time period specified in writing by the Director, unless the requirement for the report is waived by the Director.

2.3.3 The report required under 2.3.2 shall contain, at a minimum, the following information:

- (a) a description of the contravention;
- (b) the date of the contravention;
- (c) the duration of the contravention;
- (d) the legal land description of the location of the contravention;
- (e) an explanation as to why the contravention occurred;
- (f) a summary of all preventive measures and actions that were taken prior to the contravention;
- (g) a summary of all measures and actions that were taken to mitigate any effects of the contravention;
- (h) a summary of all measures that will be taken to address the remaining effects and potential effects related to the contravention;
- (i) the number of the registration issued under the Act for the wastewater system and the name of the person who held the registration at the time the contravention occurred;
- (j) the name, address, phone number and responsibilities of all persons operating the wastewater system at the time the contravention occurred;
- (k) the name, address, phone number and responsibilities of all persons who had charge, management or control of the wastewater system at the time that the contravention occurred;
- (l) a summary of proposed measures that will prevent future contraventions, including a schedule of implementation for these measures;
- (m) any information that was maintained or recorded under this Code of Practice, as a result of the incident; and
- (n) any other information required by the Director in writing.

PART 3: REQUIREMENTS SPECIFIC TO PORTIONS OF THE WASTEWATER SYSTEM

A. WASTEWATER COLLECTION SYSTEMS AND WASTEWATER LAGOONS

PART A3.1: ADMINISTRATION, DESIGN AND CONSTRUCTION REQUIREMENTS

A3.1.1 An application for a registration for a new wastewater system or for changes to an existing wastewater lagoon, as required under the Act and the regulations, shall contain, at a minimum, all of the following information:

- (a) engineering design drawings and specifications for the wastewater system, including the design capacity, stamped and signed by a professional engineer;
- (b) a determination of the adequacy of the discharge route for the transport of the treated wastewater to the ultimate receiving watercourse, without

- the occurrence of either flooding of adjacent lands or erosion of the land over which the treated wastewater discharge flows;
- (c) confirmation that an easement has been registered on the titles of all privately owned land over which the treated wastewater discharge will flow;
 - (d) a statement of the designed frequency of discharge;
 - (e) for low pressure wastewater collection systems or vacuum wastewater collection systems, the written opinion of a professional engineer regarding the adequacy of the design of the wastewater system, based, at a minimum, on the designed hydraulic capability of the wastewater collection system;
 - (f) a statement, signed and sealed by a professional engineer:
 - (i) indicating whether the design of the project complies with all design requirements of this Code of Practice, and the regulations, and
 - (ii) in cases in which a design requirement is not met, identifying and justifying the deviation;
 - (g) proposed groundwater monitoring well locations; and
 - (h) any other information required by the Director in writing.

A3.1.2 No person shall dispose of treated wastewater in a manner that was not included in the registration application or in the application for the previous approval unless prior written authorization of the Director has been obtained.

- A3.1.3 An application for a written authorization under A3.1.2 shall contain, at a minimum, all of the following information:
- (a) the owner's name;
 - (b) the approval number or registration number issued under the Act for the wastewater system;
 - (c) a description of the change in method of treated wastewater disposal;
 - (d) the legal land description of the project;
 - (e) written opinion by a professional engineer whether the requirements in Part A4.1 or B, as applicable, of this Code of Practice can be met; and
 - (f) any other information required by the Director in writing.

PART A4.1: OPERATIONAL REQUIREMENTS

General Operational Requirements

- A4.1.1 No release from the wastewater system to the environment is permitted except in accordance with this Code of Practice.
- A4.1.2 Treated wastewater from a wastewater lagoon shall be disposed of only:
- (a) by discharge in accordance with this Code of Practice;
 - (b) by treated wastewater irrigation in accordance with this Code of Practice; or
 - (c) by other methods in compliance with the Act and the regulations.
- A4.1.3 Sludge from a wastewater lagoon shall be disposed of only:
- (a) by application to land in accordance with this Code of Practice; or
 - (b) by other methods in compliance with the Act and the regulations.
- A4.1.4 The registration holder shall:
- (a) at least one week prior to the wastewater lagoon discharge, notify downstream landowners who have expressed interest in the wastewater lagoon discharge; and
 - (b) retain documentation of the notification given.

- A4.1.5 A wastewater lagoon shall be discharged into the environment only:
- (a) at a frequency not exceeding the designed frequency of discharge, or a frequency specified in writing by the Director;
 - (b) between April 1st and November 30th; and
 - (c) in a manner so that each discharge is completed within a period of three consecutive weeks, or a period authorized in writing by the Director.
- A4.1.6 The structural integrity of all portions of the wastewater lagoon shall be maintained as set out in the engineering design drawings and specifications.
- A4.1.7 No discharge from the wastewater lagoon shall cause flooding of downstream adjacent lands or erosion of any watercourse or land over which the treated wastewater discharge flows.

Certified Operator

- A4.1.8 At all times, the operation of the wastewater collection system shall be performed by, or under the direction of, a person who holds a valid wastewater collection certificate of qualification at the applicable level as set out in Table A4-1.
- A4.1.9 At all times, the operation of the wastewater lagoon shall be performed by, or under the direction of, a person who holds a valid wastewater treatment certificate of qualification at the applicable level as set out in Table A4-1.

TABLE A4-1: MINIMUM OPERATOR CERTIFICATE OF QUALIFICATION REQUIREMENTS

Population Served	Minimum Wastewater Collection (WWC) Operator Certificate of Qualification Required	Minimum Wastewater Treatment (WWT) Operator Certificate of Qualification Required
Less than 500	One operator with a Small Wastewater System Certificate	One operator with a Small Wastewater System Certificate
501 to 1,500	One operator with a Level 1 Wastewater Collection (WWC) Certificate	One operator with a Level 1 Wastewater Treatment (WWT) Certificate
1,501 to 15,000	One operator with a Level 2 Wastewater Collection (WWC) Certificate	One operator with a Level 1 Wastewater Treatment (WWT) Certificate
15,000 to 50,000	One operator with a Level 3 Wastewater Collection (WWC) Certificate	One operator with a Level 1 Wastewater Treatment (WWT) Certificate
More that 50,000	One operator with a Level 4 Wastewater Collection (WWC) Certificate	One operator with a Level 1 Wastewater Treatment (WWT) Certificate

PART A5.1: MONITORING REQUIREMENTS

A5.1.1 The wastewater lagoon discharge shall be monitored as specified in Table A5-1.

TABLE A5-1: WASTEWATER LAGOON DISCHARGE MONITORING

Parameters	Sample Type	Sampling Location	Minimum Monitoring Frequency
Carbonaceous Biochemical Oxygen Demand	Grab	Point at which treated wastewater is discharged from the wastewater lagoon	Once during discharge, after the first day of discharge
Total Suspended Solids			

A5.1.2 In addition to the monitoring of the wastewater lagoon required pursuant to A5.1.1, the following information shall also be recorded for each wastewater discharge:

- (a) the measurement, or, if measurement is not possible, estimate of the total volume of discharge; and
- (b) the dates during which discharge took place.

A5.1.3 In the event of an unauthorized release into the environment from the wastewater system:

- (a) all steps possible must be taken to stop the release;
- (b) all steps possible must be taken to mitigate all adverse effects of the release; and
- (c) the unauthorized release from the wastewater system shall be monitored in accordance with TABLE A5-2, if any portion of that unauthorized release may enter or has entered a watercourse.

TABLE A5-2: UNAUTHORIZED RELEASE MONITORING REQUIREMENTS

Parameters	Sample Type	Monitoring Location	Minimum Monitoring Frequency and Minimum Number of Samples
5 day Biochemical Oxygen Demand	Grab	At the release point, before any dilution	One sample during the unauthorized release
Total Suspended Solids			
Ammonia-Nitrogen			
Total Coliform			
Fecal Coliform			

- A5.1.4 In addition to any monitoring required in A5.1.3, in the event of an unauthorized release, the total volume of any unauthorized release from the wastewater system into the environment shall be:
- (a) measured, or, if measurement is not possible, estimated; and
 - (b) recorded.

Groundwater Monitoring Program

- A5.1.5 In addition to any other monitoring required pursuant to the Act or the regulations, or this Code of Practice, a groundwater monitoring program shall be conducted for each wastewater lagoon:
- (a) where there was a requirement to conduct groundwater monitoring, existing just prior to the application of this Code of Practice to the particular wastewater system;
 - (b) that is new; or
 - (c) that has undergone a structural change that has the potential to affect the treatment.
- A5.1.6 The groundwater monitoring program shall consist, at a minimum, of the following:
- (a) for:
 - (i) a new wastewater lagoon or a lagoon that has undergone a structural change that has the potential to affect the treatment, obtain one sample from each groundwater monitoring well:
 - A. prior to putting the new lagoon into operation; and
 - B. three times, approximately three (3) months apart, during the first year of operation; or
 - (ii) a wastewater lagoon set out in A5.1.5(a), obtain the remainder of the samples required to complete the monitoring required under subsection (a)(i); and
 - (b) analyze each sample in (a) for all of the following parameters:
 - (i) pH,
 - (ii) conductivity,
 - (iii) calcium,
 - (iv) magnesium,
 - (v) total hardness,
 - (vi) sodium,
 - (vii) potassium,
 - (viii) iron,
 - (ix) total phosphorus,
 - (x) nitrate-nitrogen,
 - (xi) nitrite-nitrogen,
 - (xii) ammonia-nitrogen,
 - (xiii) chloride,
 - (xiv) fluoride,
 - (xv) sulphate,
 - (xvi) carbonate,
 - (xvii) bicarbonate,
 - (xviii) total alkalinity,
 - (xix) total dissolved solids (TDS),
 - (xx) total Kjeldahl nitrogen (TKN), and
 - (xxi) chemical oxygen demand (COD).
- A5.1.7 In addition to the groundwater monitoring required under A5.1.6, the following measurements shall be taken at the location of each groundwater monitoring well:

- (a) the depth to water at each groundwater monitoring well shall be measured at the same time as monitoring is conducted pursuant to A5.1.6; and
- (b) after the first year of operation of the wastewater lagoon, the depth to water at each groundwater monitoring well shall be measured:
 - (i) immediately before wastewater lagoon discharge,
 - (ii) immediately after each wastewater lagoon discharge is complete, and
 - (iii) approximately one month after the end of each wastewater lagoon discharge.

PART A6.1: RECLAMATION REQUIREMENTS

- A6.1.1 Where the land surface has been disturbed during construction, expansion, modification or repair of any portion of a wastewater collection system, reclamation of the land surface to equivalent land capability shall be performed following the construction, expansion, modification or repair, in accordance with the *Standards and Guidelines for Municipal Waterworks, Wastewater and Storm Drainage Systems*, published by the Department, as amended or replaced from time to time.
- A6.1.2 At least six months prior to the wastewater lagoon permanently ceasing operation, the Director shall be informed in writing of the intention to close the wastewater lagoon.
- A6.1.3 Within six months after the wastewater system permanently ceases operation, the registration holder shall submit to the Director a reclamation plan.
- A6.1.4 The reclamation plan shall contain, at a minimum, the following information:
- (a) proposed plan for wastewater discharge and sludge management prior to reclamation;
 - (b) a proposal for reclaiming all disturbed land to equivalent land capability, or a proposal for reuse of the site;
 - (c) the depth of topsoil at the wastewater lagoon prior to construction or, in the absence of that pre-construction depth, the depth of undisturbed topsoil on property adjacent to the site of the lagoon, unless reuse of the site is proposed;
 - (d) a description of the status of, and proposed measures to address:
 - (i) the final use of the reclaimed areas,
 - (ii) the proposed depth of topsoil to be replaced,
 - (iii) the restoration of the original contours of the land,
 - (iv) erosion control,
 - (v) weed control, and
 - (vi) revegetation of the wastewater lagoon site; and
 - (e) any other information required by the Director in writing.
- A6.1.5 Any person conducting reclamation shall do so in accordance with the reclamation plan, as authorized by the Director in writing.
- A6.1.6 Within one (1) year from the date of completion of reclamation, the registration holder shall submit a final reclamation report to the Director.
- A6.1.7 The final reclamation report required under A6.1.6 shall contain, at a minimum, the following information:
- (a) a statement of whether the site has achieved equivalent land capability;
 - (b) if the site has not achieved equivalent land capability, an explanation of the reason;

- (c) confirmation of whether the topsoil was replaced in accordance with the reclamation plan;
- (d) a description of the final land use;
- (e) a description of the land contours of the site;
- (f) a statement of whether the original contours of the site have been restored;
- (g) if the original contours of the site have not been restored, an explanation of the reason;
- (h) a description of steps taken to control erosion;
- (i) a statement of the degree of success of the erosion control steps and further steps that will be taken;
- (j) a list of species used for revegetation;
- (k) a description of the weed control measures undertaken; and
- (l) any other information required by the Director in writing.

PART A7.1: REPORTING REQUIREMENTS

Annual Reporting

- A7.1.1 In addition to any other reporting required under the Act, the regulations, and this Code of Practice, the registration holder shall submit an annual report to the Director by February 28 of the year following the year in which the information was collected.
- A7.1.2 The annual report required in A7.1.1 shall contain, at a minimum, all of the following information:
- (a) the results of the treated wastewater discharge monitoring and measurements required in A5.1.1 and A5.1.2;
 - (b) the groundwater monitoring information required in A5.1.6 and A5.1.7, and an interpretation of the analytical results with respect to any potential adverse effect or unsatisfactory liner performance;
 - (c) information regarding treated wastewater irrigation, as required under B6.1.1 and B6.1.2; and
 - (d) information regarding sludge application to land, as required under C5.1.1.
- A7.1.3 The annual report shall be submitted by a method:
- (a) in compliance with the Act and the regulations; or
 - (b) authorized in writing by the Director.

Electronic Reporting

- A7.1.4 The Director may, by notice in writing, require the registration holder to submit periodic reports under this Code of Practice:
- (a) in an electronic format; and
 - (b) more frequently than specified in A7.1.1 of this Code of Practice.
- A7.1.5 The registration holder who receives a notice as specified in A7.1.4 shall comply with the notice.

PART A8.1: RECORD KEEPING REQUIREMENTS

- A8.1.1 The registration holder shall:
- (a) record; and
 - (b) maintain for the life of the wastewater system an operating record, which shall contain, as a minimum, all the following information:
 - (i) a wastewater lagoon site evaluation report,
 - (ii) a copy of all registrations and authorizations issued under the Act regarding the wastewater system,

- (iii) as-built drawings for the wastewater lagoon showing the final grades and structural components,
- (iv) the current version of the design for the wastewater system,
- (v) operating procedures for the wastewater system,
- (vi) any complaints received regarding any potential adverse effect of the wastewater lagoon operation, and how they were resolved,
- (vii) the date and nature of all maintenance conducted at the wastewater lagoon,
- (viii) all documentation informing the Director regarding all extensions and replacements of any portion of the wastewater system,
- (ix) a copy of all documentation informing the Director of the intention to conduct treated wastewater irrigation or sludge application to land,
- (x) documentation of all notifications given to downstream land users as required under A4.1.4,
- (xi) treated wastewater irrigation information required under B7.1.1,
- (xii) sludge application information required under C6.1.1,
- (xiii) copies of the annual reports required under this Code of Practice,
- (xiv) a copy of all documentation informing the Director of a contravention as required under 2.3.3,
- (xv) a copy of all inspection reports issued by the Department regarding the wastewater system,
- (xvi) a copy of the reclamation plan as required in A6.1.3 and A6.1.4,
- (xvii) a copy of the final reclamation report as required in A6.1.6, and
- (xviii) a record of the names of all past and current certified operators, including updates.

A8.1.2 The registration holder shall provide any records or data regarding the wastewater system to the Director or inspector upon request.

B. TREATED WASTEWATER IRRIGATION

PART B3.1: ADMINISTRATION, DESIGN AND CONSTRUCTION REQUIREMENTS

- B3.1.1 No person shall commence irrigation using treated wastewater for the first time at a particular site:
- (a) for irrigation of a crop authorized within the *Guidelines for Municipal Wastewater Irrigation*, published by the Department, as amended or replaced from time to time, unless the Director has been informed in writing of the intention to conduct treated wastewater irrigation; or
 - (b) for irrigation of any other vegetation, except in accordance with the written authorization of the Director for the wastewater irrigation.
- B3.1.2 The written information in B3.1.1(a) or application for written authorization in B3.1.1(b) shall contain, at a minimum, all of the following:
- (a) the registration number issued by the Department for the wastewater lagoon from which the treated wastewater will be taken for use in irrigation;
 - (b) the location of the land that will be used for the proposed irrigation;
 - (c) the proposed irrigation rate;
 - (d) a description of how the proposed irrigation rate was derived;

- (e) the method and description of the proposed irrigation;
- (f) written consent to the proposed irrigation from:
 - (i) all registered owners of land on which the treated wastewater will be irrigated, and
 - (ii) the local authorities of all municipalities in which the land to be irrigated is located; and
- (g) any other information requested in writing by the Director.

B3.1.3 In addition to any requirements in the Act, the regulations, or this Code of Practice, the design of a new, or expansion of existing, wastewater irrigation shall meet as a minimum the assessment protocols and requirements set out in *Guidelines For Municipal Wastewater Irrigation*, published by the Department, as amended or replaced from time to time, for the following areas:

- (a) assessment of municipal wastewater quality for wastewater irrigation;
- (b) assessment of land suitability for wastewater irrigation; and
- (c) assessment of system design needs for wastewater irrigation.

B3.1.4 For wastewater irrigation of a golf course or park, the design of the wastewater irrigation operation shall include capability for disinfection of the treated wastewater prior to irrigation.

PART B4.1: OPERATIONAL REQUIREMENTS

- B4.1.1 No person shall conduct treated wastewater irrigation except in accordance with:
- (a) this Code of Practice;
 - (b) the regulations; or
 - (c) an approval,
- as the case may be.
- B4.1.2 The registration holder shall not conduct treated wastewater irrigation at an irrigation rate that exceeds the application rate specified in the written information provided to the Director in accordance with B3.1.2.
- B4.1.3 No person shall cause or permit any connection between the treated wastewater irrigation equipment and any waterworks system.
- B4.1.4 The surface impoundment, other than the wastewater lagoon site, storing treated wastewater to be used for irrigation shall have signs placed around the perimeter of the impoundment, identifying that treated wastewater is stored in the impoundment.
- B4.1.5 Any treated wastewater irrigation must comply with the following setbacks:
- (a) a setback distance of at least 15 metres shall be provided between all irrigated land and all adjacent property unless permission is received from all of the registered owners of all adjacent land to lessen this distance to a particular distance;
 - (b) a setback distance of at least 60 metres shall be provided between all irrigated land and all occupied dwellings; and
 - (c) a setback distance of at least 30 metres shall be provided between all irrigated land and all watercourses, public roads, railway lines, or water wells.
- B4.1.6 Treated wastewater irrigation shall not occur during the following periods, unless otherwise authorized in writing by the Director:
- (a) outside the growing season;
 - (b) during and for 30 days prior to the harvesting of crops on the land irrigated or to be irrigated;

- (c) during and for 30 days prior to grazing by dairy cattle on the land irrigated or to be irrigated; and
- (d) during and for 7 days prior to pasturing by livestock other than dairy cattle on the land irrigated or to be irrigated.

Wastewater Irrigation of a Golf Course or Park

B4.1.7 through B4.1.9 apply in addition to the requirements under B4.1.1 through B4.1.6 of this Code of Practice

- B4.1.7 Prior to any irrigation of a golf course with treated wastewater, signs shall be posted in the clubhouse and throughout the golf course stating that treated wastewater is being used to irrigate the golf course.
- B4.1.8 Prior to any irrigation of a park with treated wastewater, signs shall be posted at each entrance of the park, and at locations throughout the park, stating that treated wastewater is being used to irrigate the park.
- B4.1.9 Treated wastewater irrigation shall:
 - (a) commence after closing of the golf course or park, at a time when no members of the public are present; and
 - (b) end a minimum of one hour before opening of the golf course or park to members of the public.

PART B5.1: LIMITS AND MONITORING REQUIREMENTS

B5.1.1 The quality of all treated wastewater to be used for irrigation shall comply with the limits specified in TABLE B5-1.

TABLE B5-1: IRRIGATION TREATED WASTEWATER LIMITS

Parameter	Limit
Carbonaceous Biochemical Oxygen Demand	<100 mg/L
Chemical Oxygen Demand	<150 mg/L
Total Suspended Solids	<100 mg/L
Electrical Conductivity	<2.5 dS/m
Sodium Adsorption Ratio	<9
pH	6.5 to 8.5

B5.1.2 The treated wastewater used for irrigation shall be monitored in accordance with TABLE B5-2.

TABLE B5-2: MONITORING OF TREATED WASTEWATER USED FOR IRRIGATION

TREATED WASTEWATER USED FOR IRRIGATION FOR EACH IRRIGATION SITE			
Parameter	Frequency	Sample type	Sample location
Carbonaceous Biochemical Oxygen Demand			

Chemical Oxygen Demand	One sample each: (a) prior to each irrigation application season and (b) at the mid point of each irrigation season	Grab	At the treated wastewater irrigation intake point
Total Suspended Solids			
Electrical Conductivity			
Sodium Absorption Ratio			
pH			

- B5.1.3 In addition to any other monitoring of wastewater used for irrigation required under Part B5.1, the registration holder shall measure the following:
- (a) weekly volume of irrigation wastewater applied to the site; and
 - (b) total volume of irrigation wastewater applied to the site during the application season.

Wastewater Irrigation of a Golf Course or Park

B5.1.4 In addition to meeting the quality limit requirements pursuant to B5.1.1 and Table B5-1, the irrigation wastewater used for irrigation of a golf course or park shall meet the limits in TABLE B5-3.

TABLE B5-3: GOLF COURSE AND PARK IRRIGATION TREATED WASTEWATER LIMITS

Parameter	Limit
Total coliform counts	< 1000 per 100 mL, based on the monthly geometric mean
Fecal coliform counts	< 200 per 100 mL, based on the monthly geometric mean
Total chlorine Residual	< 2.0 mg/L, based on the monthly arithmetic mean of daily grab samples

B5.1.5 In addition to meeting the monitoring requirements pursuant to B5.1.2, the registration holder shall monitor treated wastewater used for irrigation at a park or golf course, as specified in Table B5-4.

TABLE B5-4: MONITORING OF TREATED WASTEWATER USED FOR IRRIGATING GOLF COURSE OR PARK

Parameter	Frequency	Sample Type	Sample Location
Total coliform counts	One sample at the start of the irrigation season and then monthly for the duration of the irrigation season	Grab	At the treated wastewater irrigation intake point
Fecal coliform counts			
Total chlorine residual	One sample on each day that irrigation using chlorinated irrigation water occurs during the irrigation season		

PART B6.1: REPORTING REQUIREMENTS

B6.1.1 The registration holder shall prepare an annual report for the treated wastewater irrigation operation, as part of the annual report required in A7.1.2.

B6.1.2 The annual report in B6.1.1 shall include, at a minimum, the following information:

- (a) the total volume of treated wastewater used for irrigation, at each location; and

- (b) the analytical results and measurements as required by B5.1.2, B5.1.3 and B5.1.5 of this Code of Practice.

PART B7.1: RECORD KEEPING REQUIREMENTS

B7.1.1 The registration holder shall:

- (a) record; and
- (b) maintain within the operating record in A8.1.1, all of the following:
 - (i) the documentation of the assessment required in B3.1.3 regarding the wastewater irrigation practice,
 - (ii) all annual reports required for the treated wastewater irrigation practice under this Code of Practice, and
 - (iii) a record of all complaints received with respect to the irrigation practices, or with respect to the use of treated wastewater for irrigation, and how each complaint was resolved.

C. SLUDGE APPLICATION TO LAND

PART C3.1: ADMINISTRATION, DESIGN AND CONSTRUCTION REQUIREMENTS

C3.1.1 No person shall commence application of sludge:

- (a) to agricultural land, unless the Director has been informed in writing of the intention to apply sludge to agricultural land; or
- (b) to land other than agricultural land, except in accordance with the written authorization of the Director for the sludge application.

C3.1.2 The written information in C3.1.1(a) and the application for a written authorization in C3.1.1(b) shall contain, at a minimum, all of the following:

- (a) the registration number issued by the Department for the wastewater lagoon from which the sludge will be taken for application to land;
- (b) the location of the land that will receive sludge;
- (c) the proposed sludge application rate;
- (d) a description of how the proposed application rate was derived;
- (e) the method of sludge application;
- (f) a completed copy of the form in Appendix B of the *Guidelines for the Application of Municipal Wastewater Sludges to Agricultural Lands*, published by the Department, as amended or replaced from time to time; and
- (g) written consent to the proposed project from:
 - (i) all registered owners of land on which the sludge will be applied, and
 - (ii) the local authorities of all municipalities in which the land on which sludge will be applied is located, and
 - (iii) any other information required by the Director in writing.

C3.1.3 In addition to any requirements under the Act, the regulations or this Code of Practice, the design of a sludge application program shall comply with the sludge and site characterization requirements set out in *Guidelines For The Application of Municipal Wastewater Sludges to Agricultural Lands*, published by the Department, as amended or replaced from time to time, for the following:

- (a) determining the suitability of the site for application of the sludge;
- (b) determining the suitability of the sludge for application on agricultural land;
- (c) determining the most limiting application rate for the sludge, based on the sludge and site conditions;

- (d) determining the need for application of lime and the required lime application rate; and
- (e) determining the method of sludge application.

PART C4.1: OPERATIONAL REQUIREMENTS

- C4.1.1 Sludge from a wastewater lagoon shall be disposed of only:
- (a) by application to land in accordance with this Code of Practice;
 - (b) in accordance with the written authorization of the Director; or
 - (c) by other methods in compliance with the Act and the regulations.
- C4.1.2 The registration holder shall conduct the sludge application in accordance with the requirements for land treatment program design as set out in *Guidelines For The Application of Municipal Wastewater Sludges to Agricultural Lands*, published by the Department, as amended or replaced from time to time.
- C4.1.3 No person shall apply sludge on land unless that person has obtained prior written consent to the proposed application from:
- (a) all owners of land on which sludge is applied; and
 - (b) the local authority of all municipalities in which land that is affected by the project is located.
- C4.1.4 The registration holder shall not apply sludge at a rate that exceeds the application rate specified in the written information provided to the Director in accordance with C3.1.2.
- C4.1.5 Sludge shall not be released from the land on which it was applied.
- C4.1.6 If, in the determination under C3.1.3, the soil pH requires adjustment, lime shall be applied in accordance with the determination in C3.1.3.
- C4.1.7 Sludge shall be incorporated into the land within 48 hours following the sludge application.
- C4.1.8 Sludge shall not be applied to soil that is frozen or snow covered unless the sludge can be incorporated in accordance with C4.1.7.
- C4.1.9 No sludge shall be released in any location other than the land specified pursuant to C3.1.2.

PART C5.1: REPORTING REQUIREMENTS

Annual Report

- C5.1.1 Each year, within two months following the end of the sludge application program, the registration holder shall prepare an annual sludge application program summary report, as part of the annual report in A7.1.1, including:
- (a) actual sludge and lime application rate for each section of land;
 - (b) location of land to which sludge was applied; and
 - (c) a record of any public concerns respecting the sludge application program.

PART C6.1: RECORD KEEPING REQUIREMENTS

- C6.1.1 The registration holder shall maintain the information required under C3.1.1 within the operating record of the wastewater system

PART 4: CODE OF PRACTICE ADMINISTRATION

- 4.1 This Code of Practice will be reviewed as changes in technological or other standards warrant.

CODE OF PRACTICE FOR WATERWORKS SYSTEMS USING HIGH QUALITY GROUNDWATER [made under the *Environmental Protection and Enhancement Act*, RSA 2000, c.E-12, as amended and the *Environmental Protection and Enhancement (Miscellaneous) Regulation*, AR 118/93 as amended]

Schedule

1. Operations Program Contents

PART 1: DEFINITIONS

- 1.1 All definitions in the Act and the regulations under the Act apply except where expressly defined in this Code of Practice.
- 1.2 In this Code of Practice:
 - (a) "Act" means the *Environmental Protection and Enhancement Act*, R.S.A. 2000, c.E-12, as amended from time to time;
 - (b) "continuous" means flow measurement or sample analysis through in-line equipment that creates flow measurements or frequent, discrete sample analysis output;
 - (c) "design capacity" means the production capacity for which the waterworks system was designed, as stated in the engineering drawings and specifications for the waterworks system, provided pursuant to 3.1.3;
 - (d) "disinfection" means a chemical or physical process of treating water to inactivate microorganisms;
 - (e) "GCDWQ" means the *Guidelines for Canadian Drinking Water Quality*, published by Health Canada, as amended or replaced from time to time;
 - (f) "grab", when referring to a sample, means an individual sample collected in less than 30 minutes and which is representative of the substance sampled;
 - (g) "high quality groundwater" means groundwater that:
 - (i) does not require treatment to comply with the applicable physical, chemical, and radiological MAC or I MAC, except for fluoride, specified in the GCDWQ, for the parameters listed in the Standards and Guidelines Document,

- (ii) contains a concentration of naturally occurring fluoride of less than or equal to 2.4 mg/L, and
- (iii) is not under the direct influence of surface water;
- (h) "IMAC" means the Interim Maximum Acceptable Concentration, specified in the GCDWQ for a particular parameter;
- (i) "MAC" means the Maximum Acceptable Concentration, specified in the GCDWQ for a particular parameter;
- (j) "professional engineer" means a professional engineer or registered professional technologist (engineering) under the *Engineering, Geological and Geophysical Professions Act*;
- (k) "regulations" means the regulations under the Act;
- (l) "Standards and Guidelines Document" means the *Standards and Guidelines for Municipal Waterworks, Wastewater and Storm Drainage Systems*, published by the Department, as amended or replaced from time to time; and
- (m) "this Code of Practice" means the *Code of Practice for Waterworks Systems Using High Quality Groundwater*, published by the Department, as amended or replaced from time to time.

PART 2: GENERAL PROVISIONS

Section 2.1: General

- 2.1.1 Any person who constructs, operates or reclaims a waterworks system that uses high quality groundwater must do so in accordance with this Code of Practice.
- 2.1.2 Any conflict between the registration application and the terms and conditions of this Code of Practice shall be resolved in favour of this Code of Practice.
- 2.1.3 The terms and conditions of this Code of Practice do not affect any rights or obligations created under any other authorization issued by the Department.
- 2.1.4 The terms and conditions of this Code of Practice are severable. If any term or condition of this Code of Practice or the application of any term or condition is held invalid, the application of such term or condition to other circumstances and to the remainder of this Code of Practice shall not be affected by that invalidity.
- 2.1.5 If the registration holder monitors for any substances or parameters which are the subject of limits in this Code of Practice more frequently than is required, using procedures authorized in this Code of Practice, then the registration holder shall provide the results of such monitoring as an addendum to the reports required by this Code of Practice.

Section 2.2: Analytical Requirements

- 2.2.1 With respect to any monitoring required pursuant to this Code of Practice, all samples shall be:
 - (a) collected;
 - (b) preserved;
 - (c) stored;
 - (d) handled; and
 - (e) analyzedin accordance with:
 - (i) the *Standard Methods for the Examination of Water and Wastewater*, published by the American Public Health Association, the American Waterworks Association and the Water Environment Federation, as amended or replaced from time to time,
 - (ii) the *Methods Manual for Chemical Analysis of Water and Wastes*, published by the Alberta Research Council, as amended or replaced from time to time, or
 - (iii) a method authorized in writing by the Director.

- 2.2.2 Any analysis of a sample required pursuant to this Code of Practice, shall be done only in an approved laboratory, unless otherwise specified in writing by the Director.
- 2.2.3 Any analysis of a sample for bacteriological quality required pursuant to this Code of Practice shall be conducted only by the Alberta Provincial Laboratory for Public Health, unless otherwise specified in writing by the Director.

PART 3: ADMINISTRATION, DESIGN AND CONSTRUCTION REQUIREMENTS

Operations Program

- 3.1.1 No person shall apply for a registration unless that person has prepared or caused to be prepared a written operations program governing the operation of the waterworks system.
- 3.1.2 The operations program in 3.1.1 shall contain, at a minimum, all of the information in Schedule 1.
- 3.1.3 In addition to the information required in the Act and the regulations, an application for a registration shall contain, at a minimum, the following information:
- (a) analytical results for groundwater intended to be the potable water source;
 - (b) written confirmation that the person applying for the registration has prepared, or caused to be prepared an operations program;
 - (c) engineering drawings signed and stamped by a professional engineer for the proposed waterworks system or proposed changes to the waterworks system, including the design capacity of the proposed waterworks system or proposed change;
 - (d) a statement, signed and stamped by a professional engineer, indicating whether the design of the project complies with all the design requirements of:
 - (i) this Code of Practice, and
 - (ii) the regulations under the Act, and
 - (e) in cases in which a design requirement in clause (d) is not met, a statement, signed and stamped by a professional engineer, identifying and justifying the deviation.
- 3.1.4 No person shall install any treatment equipment that was not included in the registration application unless the Director has been advised in writing in advance of the intention to install that treatment equipment.

PART 4: OPERATIONAL REQUIREMENTS

- 4.1.1 The waterworks system shall be:
- (a) operated; and
 - (b) maintained
- at all times within its design capacity.
- 4.1.2 The registration holder shall maintain a minimum pressure of 150 kPa at all points in the water distribution system, at all times.
- 4.1.3 The registration holder shall prevent any structural or equipment malfunction in the waterworks system that may affect the quality or distribution of potable water.

Certified Operator

- 4.1.4 At all times, the operation of the waterworks system shall be performed by, or under the direction of, a person who holds a valid certificate of qualification at the applicable level as set out in Table 4-1.
- 4.1.5 At all times, the number of certified operators available to perform or direct the operation of the waterworks system must meet or exceed the applicable numbers in Table 4-1.

TABLE 4-1: MINIMUM WATERWORKS SYSTEM OPERATOR CERTIFICATE OF QUALIFICATION REQUIREMENTS

Population Served by Waterworks System	Type of treatment in the waterworks system	Minimum Number and Minimum Qualifications of Water Treatment Certified Operators	Minimum Number and Minimum Qualifications of Water Distribution Certified Operator(s)
< 500	Any type of treatment	One operator with a Small Water Systems Certificate	One operator with a Small Water Systems Certificate
500 - 1,500	System providing only disinfection	N/A	One operator with a Level I Water Distribution (WD) Certificate
	System providing both disinfection and other treatment	One operator with a Level I Water Treatment (WT) Certificate	One operator with a Level I Water Distribution (WD) Certificate
1,501 - 15,000	System providing only disinfection	N/A	One operator with a Level II Water Distribution (WD) Certificate
	System providing both disinfection and other treatment	One operator with a Level I Water Treatment (WT) Certificate	One operator with a Level II Water Distribution (WD) Certificate
15,001 - 50,000	System providing only disinfection	N/A	One operator with a Level III Water Distribution (WD) Certificate and One operator with a Level II Water Distribution (WD) Certificate

	System providing both disinfection and other treatment	One operator with a Level I Water Treatment (WT) Certificate	One operator with a Level III Water Distribution (WD) Certificate and One operator with a Level II Water Distribution (WD) Certificate
50,001 and over	System providing only disinfection	N/A	One operator with a Level IV Water Distribution (WD) Certificate and Two operators with a Level III Water Distribution (WD) Certificate and One operator with a Level II Water Distribution (WD) Certificate
	System providing both disinfection and other treatment	One operator with a Level I Water Treatment (WT) Certificate	

PART 5: LIMITS AND MONITORING REQUIREMENTS

- 5.1.1 The quality of potable water produced by the waterworks system must comply with the limits in Table 5-1:
- (a) at all locations; and
 - (b) at all times.

TABLE 5-1: POTABLE WATER QUALITY LIMITS

Parameter	Limit
The bacteriological, physical, inorganic and organic chemical and pesticide parameters listed in the Compliance Monitoring section of the Standards and Guidelines Document, except fluoride	Applicable MAC or IMAC
Total chlorine	Greater than or equal to 0.1 mg/L
Naturally occurring fluoride	Less than or equal to 2.4 mg/L
Fluoride, if fluoridation is practiced	Less than or equal to 0.8 mg/L, with a maximum monthly average variation of 0.1 mg/L and a maximum daily variation
Iron – if reduced	Applicable aesthetic objective in the GCDWQ

Manganese – if reduced	Applicable aesthetic objective in the GCDWQ
------------------------	---

- 5.1.2 Compliance with:
- (a) the MAC or IMAC for inorganic and organic chemical and pesticide parameters is determined by a running annual average of all the samples taken at any sampling point; and
 - (b) the Aesthetic Objective for iron and manganese is determined by a weekly average of all the samples taken at any sampling point.
- 5.1.3 Where a sample does not meet one or more of the bacteriological quality limits in Table 5-1, in addition to any reporting or other requirements pursuant to the Act, the regulations, or this Code of Practice, the registration holder shall carry out the corrective actions set out in the *Communication and Action Protocol for Failed Bacteriological Results in Drinking Water for Waterworks Systems Authorized under the Environmental Protection and Enhancement Act*, entered into by Alberta Environment, the Alberta Provincial Laboratory for Public Health, and Alberta Health and Wellness, as amended or replaced from time to time.

Raw Water Monitoring

- 5.1.4 Where a waterworks system practices fluoridation, the raw water shall be monitored for fluoride concentration in the following manner:
- (a) at least once per week; and
 - (b) at a location in the waterworks system prior to the addition of fluoride.
- 5.1.5 Where the waterworks system has treatment to reduce iron or manganese, the raw water shall be monitored for iron or manganese as applicable:
- (a) at least once per week; and
 - (b) at a location in the waterworks system prior to any chemical addition or treatment unit.

Potable Water Monitoring

- 5.1.6 The potable water shall be monitored in accordance with Table 5-2, unless otherwise specified in writing by the Director.

TABLE 5-2: POTABLE WATER MONITORING LOCATION AND FREQUENCY

Parameter	Type of System	Sample Type	Monitoring Location	Minimum Monitoring Frequency and Minimum Number of Samples
Bacteriological quality	All Systems	Grab	At random location(s) within the water distribution system	The frequency and number of samples as set out in the GCDWQ, without any reduction
Total chlorine	All systems	(a) and either (b) or (c) (a) Grab	(a) and either (b) or (c) (a) At the same location as the bacteriological quality sample is collected	(a) and either (b) or (c) (a) At the same location as the bacteriological quality sample is collected
		and	and	and
		(b) Grab	(b) At random location(s) within the water distribution system, or	(b) One sample per day, five days per week; if a statutory holiday falls on a monitoring day within that week, monitoring is not required on that day or
		(c) Continuous	(c) at the point of entry into the water distribution system	(c) One sample, every five minutes
The physical, inorganic and organic chemical and pesticide parameters listed in the Compliance Monitoring section of the Standards and Guidelines Document except total chlorine and trihalomethanes	Single well System	Grab	After treatment, within the water distribution system	One sample per year
	Multiple well fields within a single system, in which water is blended prior to entry into the water distribution system	Grab	After treatment, within the water distribution system, at a location where the water from all well fields has been blended	One sample per year

	Multiple well fields within a single system, in which water is not blended prior to entry into the water distribution system	Grab	At the chosen well(s), after treatment, at the point of entry into the water distribution system	At least one well monitored each year, rotated so that all wells have been monitored within the previous 3 years
Fluoride	All systems practicing fluoridation	At a location after fluoridation	(a) or (b) (a) Grab	(a) or (b) (a) One sample per day, seven days per week
			or	or
Iron	All systems employing iron reduction	After treatment, at the point of entry into the water distribution system	(a) or (b) (a) Grab	(a) or (b) (a) One sample per day, five days per week; if a statutory holiday falls on a monitoring day within that week, monitoring is not required on that day
			or	or
Manganese	All systems employing manganese reduction	After treatment, at the point of entry into the water distribution system	(a) or (b) (a) Grab	(a) or (b) (a) One sample per day, five days per week; if a statutory holiday falls on a monitoring day within that week, monitoring is not required on that day
			or	or
			(b) Continuous	(b) One sample every five minutes

- 5.1.7 In the event of a repair within the water distribution system, in addition to the monitoring required in 5.1.6, the registration holder shall monitor for:
- (a) bacteriological quality; and
 - (b) total chlorine
- by grab sample, in the following manner:
- (i) immediately after each repair, and
 - (ii) at a point closest to the location of the repair.

Trihalomethanes

- 5.1.8 In addition to any other monitoring requirements pursuant to this Code of Practice, or the Act or the regulations, trihalomethanes shall be monitored in waterworks systems in the following manner:
- (a) for waterworks systems serving a population of:
 - (i) ten thousand or more people:

- (A) three grab samples shall each be taken at a random location in the water distribution system;
- (B) one grab sample shall be taken at the location in the water distribution system furthest away from treatment; and
- (C) all four samples shall be taken within a 24 hour time period; or
- (ii) less than ten thousand people, one grab sample shall be collected at the location in the water distribution system furthest away from treatment, and
- (b) all samples shall be analyzed for trihalomethanes.

5.1.9 All monitoring required in 5.1.8 shall be conducted once every three months.

5.1.10 Despite 5.1.9, if the trihalomethanes results from the previous four (4) monitoring events are all less than the applicable MAC or IMAC, subsequent monitoring shall be conducted, at a minimum, in the following manner:

- (a) for waterworks systems serving a population of:
 - (i) ten thousand or more people:
 - (A) at least one grab sample shall be collected at the location in the water distribution system furthest away from treatment; and
 - (B) the monitoring frequency shall be at least once a year, unless otherwise authorized in writing by the Director; or
 - (ii) less than ten thousand people:
 - (A) at least one sample shall be collected at the location in the water distribution system furthest away from treatment; and
 - (B) the monitoring frequency shall be at least once every three years, unless otherwise authorized in writing by the Director; and
- (b) all samples shall be analyzed for trihalomethanes.

5.1.11 If any trihalomethanes result exceeds the applicable MAC or IMAC, monitoring pursuant to 5.1.9 shall be continued.

Additional Measurements

5.1.12 The water volume from each source of water supply shall be measured each day, five days per week; if a statutory holiday falls on a measuring day within that week, measuring is not required on that day.

5.1.13 If the waterworks system practices fluoridation:

- (a) the total volume of water to which fluoride is added; and
- (b) the total weight of fluoride added to the water;

shall be measured on a daily basis.

5.1.14 Where any treatment chemical is added to the waterworks system, the daily dosage of each chemical added:

- (a) shall be calculated in milligrams of chemical per litre of water; and
- (b) shall not exceed the dosage specified as Maximum Use in *Standard 60*, published by the National Sanitation Foundation and the American National Standards Institute (NSF/ANSI), as amended or replaced from time to time, unless otherwise authorized in writing by the Director.

PART 6: WASTEWATER REQUIREMENTS

- 6.1.1 The registration holder shall dispose of wastewater only:
- (a) to a wastewater collection system, that is part of a wastewater system holding a valid approval, registration or permit, as applicable; or
 - (b) as otherwise authorized in writing by the Director.

PART 7: RECLAMATION REQUIREMENTS

- 7.1.1 Where the land surface has been disturbed during construction, expansion, modification or repair of any portion of a waterworks system, reclamation of the land surface to equivalent land capability shall be performed following the construction, expansion, modification or repair, in accordance with the Standards and Guidelines Document.
- 7.1.2 Within six months after the waterworks system permanently ceases operation, the registration holder shall submit a reclamation plan to the Director.
- 7.1.3 No person shall commence reclamation of the waterworks system until that person has received written authorization from the Director for the reclamation.
- 7.1.4 Any person conducting reclamation of the waterworks system shall comply with the reclamation plan, as authorized in writing by the Director.

PART 8: REPORTING REQUIREMENTS

Contravention Reporting

- 8.1.1 In addition to any other reporting required pursuant to this Code of Practice, the Act, or the regulations, the registration holder shall immediately report to the Director any contravention of this Code of Practice, either:
- (a) by telephone at (780) 422-4505; or
 - (b) by a method:
 - (i) in compliance with the release reporting provisions in the Act and the regulations, or
 - (ii) authorized in writing by the Director.
- 8.1.2 In addition to any other reporting required pursuant to this Code, the Act, or the regulations, the registration holder shall immediately report to the Director by a method under 8.1.1, any structural or equipment malfunction in the waterworks system that may affect the quality or supply of potable water.
- 8.1.3 In addition to the immediate report in 8.1.1, the registration holder shall provide a report to the Director:
- (a) in writing; or
 - (b) by a method:
 - (i) in compliance with the release reporting provisions in the Act and the regulations, or
 - (ii) authorized in writing by the Director
- within seven (7) calendar days after the discovery of the contravention, or within another time period specified in writing by the Director, unless the requirement for the report is waived by the Director.
- 8.1.4 The report required under 8.1.3 shall contain, at a minimum, the following information:
- (a) a description of the contravention;
 - (b) the date of the contravention;
 - (c) the duration of the contravention;
 - (d) the legal land description of the location of the contravention;
 - (e) an explanation as to why the contravention occurred;
 - (f) a summary of all preventive measures and actions that were taken prior to the contravention;

- (g) a summary of all measures and actions that were taken to mitigate any effects of the contravention;
- (h) a summary of all measures that will be taken to address any remaining effects and potential effects related to the contravention;
- (i) the number of the registration issued under the Act for the waterworks system, and the name of the person who held the registration at the time the contravention occurred;
- (j) the name, address, phone number and responsibilities of all persons operating the waterworks system at the time the contravention occurred;
- (k) the name, address, phone number and responsibilities of all persons who had charge, management or control of the waterworks system at the time that the contravention occurred;
- (l) a summary of proposed measures that will prevent future contraventions, including a schedule of implementation for these measures;
- (m) any information that was maintained or recorded under this Code of Practice, as a result of the incident; and
- (n) any other information required by the Director in writing.

Monthly Reporting

- 8.1.5 The registration holder shall compile monthly reports.
- 8.1.6 The monthly report in 8.1.5 shall include, at a minimum:
- (a) the name and telephone number of all certified operators;
 - (b) the analytical results for all parameters required to be monitored in accordance with this Code of Practice during the month;
 - (c) the locations of all sampling performed during the month in accordance with this Code of Practice;
 - (d) the name and manufacturer of all treatment chemicals added during the month, and each manufacturer as listed in the *Standard 60*, published by the American National Standards Institute and the National Sanitation Foundation (ANSI/NSF), as amended or replaced from time to time; and
 - (e) the results of all required measurements conducted during the month in accordance with this Code of Practice.

Annual Reporting

- 8.1.7 In addition to any other reporting required under the Act, the regulations and this Code of Practice, the registration holder shall submit to the Director an annual report, by February 28 of the year following the calendar year in which the information on which the report is based was collected.
- 8.1.8 The annual report in 8.1.7 shall contain, at a minimum, all of the following information:
- (a) a summary of the monthly reports, specifying the monthly minimum, average, and maximum results for each parameter monitored;
 - (b) the results of any other compliance monitoring done during the year pursuant to this Code of Practice, that was not included in any monthly report; and
 - (c) a description of any problems experienced and corrective actions taken at the waterworks system during the year with respect to environmental matters.

Electronic Reporting

- 8.1.9 The Director may, by notice in writing, require the registration holder to submit periodic reports:
- (a) in an electronic format; and
 - (b) more frequently than specified in 8.1.5 and 8.1.7 of this Code of Practice.
- 8.1.10 The registration holder who receives a notice as specified in 8.1.9 shall comply with the notice.

PART 9: RECORD KEEPING REQUIREMENTS

- 9.1.1 The registration holder shall:
- (a) record the following information; and
 - (b) maintain the following records for five (5) years from the date the record was created:
 - (i) bacteriological analysis results,
 - (ii) daily records, including but not limited to:
 - (A) flow meter readings;
 - (B) chlorine concentrations;
 - (C) treatment chemical dosages;
 - (D) iron and manganese concentrations; and
 - (E) all fluoridation informationrequired under this Code of Practice;
 - (iii) all monthly reports required under this Code of Practice, and
 - (iv) records of action taken by the registration holder to correct contraventions of potable water quality limits (MAC or IMAC), including the following information for each contravention:
 - (A) name and address of the person who discovered the contravention; and
 - (B) copies of all notifications to the public.
- 9.1.2 The registration holder shall maintain the following records for the life of the waterworks system:
- (a) the operations program;
 - (b) copies of all:
 - (i) applications submitted to the Department for a registration regarding the waterworks system and correspondence related to the registration,
 - (ii) engineering drawings and specifications,
 - (iii) project reports,
 - (iv) construction documents,
 - (v) record drawings,
 - (vi) all reports of inspections conducted by the Department,
 - (vii) all correspondence sent to the Department regarding a proposed extension of a water distribution system, replacement of a portion of a water distribution system, expansion or modification of potable water storage within the water distribution system,
 - (viii) all annual reports,
 - (ix) all registrations issued under the Act for the waterworks system,
 - (x) all annual reports, and
 - (xi) all reports prepared pursuant to 8.1.3 and 8.1.4, and
 - (c) all physical, organic and inorganic chemical and pesticide analytical results required pursuant to this Code of Practice, excluding daily monitoring.

- 9.1.3 The results and records in 9.1.1(b) and 9.1.2(c) shall contain, at a minimum, all of the following information:
- (a) the date, location and time of monitoring, and the name of the person collecting the sample;
 - (b) identification of the sample type, including, but not limited to whether the sample is a routine water distribution system sample, repeat sample, source or potable water sample, or other special purpose sample;
 - (c) date of analysis;
 - (d) laboratory name and person responsible for performing analysis;
 - (e) the analytical method used; and
 - (f) the results of the analysis.
- 9.1.4 The registration holder shall immediately provide any records, reports or data required to be created under this Code of Practice to the Director or an inspector, upon request.

PART 10: CODE OF PRACTICE ADMINISTRATION

- 10.1.1 This Code of Practice will be reviewed as changes in technological or other standards warrant.

Schedule 1 Operations Program Contents

- 1. Routine Operational Procedures, which shall, at a minimum, include:**
 - (a) contact name and telephone numbers for the system owner, system operator, engineering consultants and equipment suppliers;
 - (b) operating instructions:
 - (i) general description of treatment process and operating procedures,
 - (ii) performance requirements, and
 - (iii) location of equipment major controls;
 - (c) general maintenance schedule; and
 - (d) general maintenance instructions for:
 - (i) treatment/process equipment,
 - (ii) monitoring equipment, and
 - (iii) pumping equipment; and
 - (e) the schedule and procedures for cleaning and flushing of the entire water distribution system, including potable water storage reservoirs.
- 2. Routine Operational Procedures for Monitoring and Analysis, which shall, at a minimum, include:**
 - (a) operational and compliance tests to be performed;
 - (b) methods used for monitoring and analysis; and
 - (c) locations of monitoring points.
- 3. Emergency Response Plan, which shall, at a minimum, include steps to be taken in the event of the following:**
 - (a) bacteriological results exceeding the prescribed limits;
 - (b) low chlorine residual;
 - (c) equipment breakdown;
 - (d) flood;
 - (e) water distribution system pipeline break and repair, and the return of the pipeline to service;
 - (d) power failure; and
 - (e) the waterworks system becoming inoperable, including steps in providing an alternate potable water supply.

SUSTAINABLE RESOURCE DEVELOPMENT

Alberta Fishery Regulations, 1998

Notice of Variation Order 22-2003

Commercial Fishing Seasons

The close times and quotas set out in Schedule 8 to the Alberta Fishery Regulations in respect of the waters listed in the Schedule to this Notice have been varied by Variation Order 22-2003 by the Director of Fisheries Management in accordance with section 3 of the Alberta Fishery Regulations.

Where fishing with gill nets is permitted during an open season established by the Order, the gill net mesh size has been specified in the Order.

Pursuant to Variation Order 22-2003 commercial fishing is permitted in accordance with the following schedule.

SCHEDULE PART 1

Item - 1.

Column 1 Waters - In respect of: (10) Burnt Lake (67-3-W4)

Column 2 Gear - Gill net not less than 140 mm mesh

Column 3 Open Time - 16:00 hours December 11, 2003 to 16:00 hours December 14, 2003

Column 4 Species and Quota - 1) Lake whitefish: 4,500 kg; 2) Walleye: 400 kg; 3) Yellow perch:

1 kg; 4) Northern pike: 1,000 kg; 5) Tullibee: 4,500 kg; 6) Lake trout: 1 kg

Column 1 Waters - In respect of: (85) Primrose Lake (67-1-W4)
